

CONFERENCE AIMS

To inform all participants about the latest clinical and pharmaceutical research trends, innovations and strategies to address current and future clinical challenges facing our world today, including chronic disease, pandemic infections, and microbial resistance.

To encourage researchers from Iraq and internationally to disseminate their research findings.

To empower and facilitate healthcare professionals and researchers to collaborate, innovate and help to shape the future health landscape.

To provide opportunities for early career researchers to present their work and gain feedback from the international scientific committee.

The event programme includes keynote presentations and workshops from prestigious world-renowned researchers at the University of Wolverhampton (UK):

Professor Tracy Warr, Professor of Neuro-oncology and Director of Research Institute of Healthcare Sciences: Addressing global health challenges: Health research at the UoW

Professor Paul Kirkham, Professor of Cell Biology: Stressful times for chronic lung disease: From pathophysiology to biomarkers

Professor Rebecca Jester, Professor of Nursing: The relationship between patients' weight and outcomes following primary total knee replacement: Reviewing the evidence

Dr Hana Morrissey, Reader in Clinical Pharmacy: Medication management and adherence

Dr Ian Lahart, Reader in Exercise Physiology: Exercise as medicine: Is a dose of reality needed? Pharmacy Workshop: Professor Patrick Ball, Professor of Pharmacy Practice: Parenteral nutrition

Clinical Research Symposium

ABSTRACT SUBMISSIONS:
