Academic Program Description Form

University Name: Al-Kitab University Faculty/Institute: College of Dentistry

Academic Program Name: Dentistry Final Certificate Name: B.D.S in Dentistry Academic System: Annual Description Preparation Date: 1/10/2024 File Completion Date: 1/10/2024

Scientific Associate Name:

Signature:

Lecturer Dr. Sabah Nori Mezil Date: 1/10/2024

The file is checked by:

Department of Quality Assurance and University Performance Director of the Quality Assurance and University Performance Department:

Lecture Mohammed Noaman Murad

Date: 1/10/2024

Signature:

Approval of the Dean

Assit. Prof. Dr. Haithem A.AZiàra

1. Program Vision

Our vision in the College of Dentistry at AL-Kitab is to be known as the future leader in dental education, and the ability to produce sound scientific research in the Middle East, and we look at the College of Dentistry to be in the ranks of medical institutions recognized Arab and international programs Innovative education that serves the diverse segments of society through a highly skilled graduate capable of communicating, caring and caring for the patient.

2. Program Mission

The mission of the College of Dentistry at AL-Kitab University is to direct and adapt all its resources to achieve excellence in education, research and patient care, and to contribute to the improvement of oral and dental health and the prevention of diseases throughout Iraq to provide services and medical care in the field of dentistry, Through prevention, early diagnosis and treatment of oral dental, facial and maxillofacial diseases.

This message includes key elements in improving oral and dental health care in Iraq to include education, scientific research, continuing education,

3. Program Objectives

The College of Dentistry aims to:

- 1. Preparing generations of dentists, specialists, consultants and experts in various fields of dentistry.
- 2. Utilizing the resources of the human section and its medical and research capabilities and the expertise of college members, professors and graduates of the College to solve the problems of society in the fields of dentistry.
- 3. Organizing scientific symposia, conferences, workshops, scientific meetings and continuing medical education courses related to the fields of dentistry inside and outside Iraq, with the aim of exchanging information and

working to raise the scientific level of the workers in the field of oral and dental medicine.

- 4. To be a pioneer in the region with international features in the production of modern knowledge in dentistry.
- 5. Provide students with the basic sciences, behaviour and skills necessary to start practicing the profession of dentistry and to promote oral and dental care in the community, and to graduate qualified dentists capable of providing quality and comprehensive health care.
- 6. Achieving the requirements and requirements of local and international academic accreditation.
- 7. Build and support an environment conducive to scientific research for students and College members and strengthen partnerships and agreements with local and international institutions to improve oral and dental health by addressing health issues of concern to all segments of society.
- 8. Provide scientific consultations in the specialized fields to the relevant authorities in Iraq.
- 9. Spreading cultural awareness and attention to the maintenance of oral and dental health in Iraq, in its governorates, districts, districts and villages.
- 10. The orientation towards the formation and translation of books in the field of oral medicine and all related fields, and conducting scientific studies to develop aspects of applied practice.

Professional Development

Mentoring new faculty members

Negotiation and persuasion: The student can influence, persuade, discuss and reach agreements.

Leadership: The student must lead, motivate and guide others.

Independence at work: The student can take responsibility and work independently under different circumstances.

Professional development of faculty members

include students with a certain cumulative rate according to the central admission system, as well as stu- dents with physical, mental and social capacity to manage any medical condition or practice required by the study. Most dental schools require personal interviews with candidates to assess qualities such as the desire to help people, self-confidence, and the ability to meet challenges, the ability to work with people and the ability to work independently. 12. Acceptance Criterion

1. Books and scientific resources of the faculty.

13. The most important sources of information about the program

 University Guide. 4. Books and scientific resources of the faculty.

Description of the Academic Programme

This description of the academic programme provides a brief account of the most important characteristics of the programme and the learning outcomes expected by the student to achieve. It highlights on whether they have made the most advantages of the opportunities available. It is accompanied by a description of each academic course within the programme.

1. Educational Institution	Ministry of Higher Education and Scientific Research/AL-Kitab
	University
2. University Department \ Centre	College of dentistry
3. Name of Academic Programme	Dentistry
4.The name of the final certificate	Bachelor's degree in Oral, Maxillofacial and Dental Medicine and Surgery
5. Academic Study System	Yearly
6. Approved Accreditation Programme	
7. Other External Influences	Academic Training Courses to develop the professional skills of students /summer training courses for two years
8. Preparation Date of this Description	2022-2021.

9. Objectives of the Academic Programme

The College of Dentistry was established in 1953 and aims at preparing medical cadres specialised in Oral, Maxillofacial and Dental Medicine and Surgery at a distinguished scientific and professional level. The faculty has a special dental teaching hospital, where students are clinically trained in modern clinics and in all academic disciplines of dentistry (Oral, Maxillofacial and Dental Medicine and Surgery, prosthodontics, pedodontics and preventive dental medicine, orthodontics, dental plastic surgery, periodontics and oral diagnosis) using the latest techniques, in addition to delivering lectures and teaching the students in various scientific and applied laboratories, and the duration of the study in the faculty is five years.

10. Programme outputs and teaching, learning and assessment methods

(A) Cognitive Objectives (Knowledge and Understanding)

- A.1- students gain knowledge of scientific and medical terminology used in dentistry and theoretical subjects.
- A.2- student familiarises with different types of materials and equipment used in the field of dentistry.
- A.3- developing students confidence to deal with all types of patients.
- A.4- developing students capacity to deal with different treatment situations.
- A.5- promoting the principles of participation of a group of students to discuss a pathological condition and how to treat it.
- A.6- providing students with full knowledge for preparing an integrated treatment plan for patients.

B—Programme Skill Objectives

B.3- Promoting the ethics of the profession and dealing of patients by the

graduates B.2. Students acquire different therapeutic skills

B.2. Promoting the principle of lifelong learning in order to continue professional development.

Methods of Teaching and Learning

- Lecturing.
- Providing students with lectures on the faculty site.
- Instructional films.
- Monitors and digital cameras.
- Using instructional models.
- Academic training courses and workshops.
- Applied clinical education.
- Aggregation of students

Assessment Methods

- Theoretical tests.
- Oral tests.
- Laboratory practical tests.
- Mannequin process tests.
- Practical tests on patients.
- Reports and studies

C—**Emotional and Moral Targets**

C1—Thinking Skill depends on student ability (let think about thinking ability). The goal of this skill is to make students to believe what is concrete (student capacity) to understand when, what and how to think and improve their ability to think reasonably.

- C2—Critical thinking skill that aims to pose a problem, analyse it logically and reach the solution required.
- C 3-Student awareness of the need to balance freedom and responsibility.
- C4—Making the right decision for the benefit of the patient and based on logical reasoning.

Methods of Teaching and Learning

- Lectures that assess student research and teaching them ways to confront and solve problems.
- Following up the way student thinks, how they make expression and how quickly they respond.
- Laboratory experiments.
- Self-study.

12. Certified certificates and hours

The first stage requires certified (750 hours) and (36units)

The second stage requires certified (915 hours) and (42.5 units)

The third stage requires certified (900 hours) and (42 units)

The fourth stage requires certified (1140 hours) and (48 units) plus (208 hours) summer training

Total hours for the fourth stage are (1348 hours)

The fifth stage requires certified (1050 hours) and (45 units) plus (224 hours) summer training

Total hours for the fifth stage are (1274 hours)

Bachelor's degree in Oral, Maxillofacial and Dental Medicine and Surgery requires (5112) certified hours for all five years of study.

13. Plan your personal development

Negotiation and persuasion: The student can influence, persuade, discuss and reach agreements.

Leadership: The student must lead, motivate and guide others.

Independence at work: The student can take responsibility and work independently under different circumstances.

4. Acceptance criterion (establishment of regulations on admission to the faculty or institute)

Admission criteria include students with a certain cumulative rate according to the central admission system, as well as stu- dents with physical, mental and social capacity to manage any medical condition or practice required by the study. Most dental schools require personal interviews with candidates to assess qualities such as the desire to help people, self-confidence, and the ability to meet challenges, the ability to work with people and the ability to work independently.

Review of the Performance of Higher Education Institutions (Review of the Academic Programme)

Academic Course Description

This academic course description provides a brief of the most important characteristics of the academic course and the learning outcomes, the student is expected to achieve, highlighting whether they have made the most advantages of the learning opportunities available and they must be linked to the description of the programme.

1. Educational Institution	AL-Kitab University
2. University Department/Centre	College of dentistry
3. Name/Symbol of Academic Programme	Human Anatomy101AN
4. The name of the final certificate	Anatomy of a human body
5. Academic Study System	Lectures, laboratories and clinics

6. Semester/Year	
	The first and second severations of the first stage
	The first and second semesters of the first stage
7. Number of hours for academic course (total)	30 theoretical hours and 60 practical hours
8. Preparation Date of this Description	2022-2021.
9. Objectives of the Academic Programme:	1

The scientific preparation of students in relation to the human anatomy, especially, regarding to the anatomy of the head, neck and its relationship to his or her precise competence as a dentist.

10. Programme outputs and teaching, learning and assessment methods

A- Cognitive Objectives (Knowledge and Understanding)

A.1 -Acquiring knowledge about human anatomy A.2 -Focusing on head and neck anatomy A-1- Their relationship to his/her competence as a dentist

B- Programme Skill Objectives

B 1-Relationship of human anatomy to student work as a dentist B 2-Gaining full knowledge of the organs of the human body B3-

Methods of Teaching and Learning

- Lectures using (Power Point) (Data Show)
- Instructional films.
- Providing students with links and some websites to use them.
- Practical laboratory on anatomical models

Assessment Methods

- Theoretical Examinations.
- Practical Examinations.
- Oral Examinations.
- Quiz Examinations.

C-Thinking Skills

C.1- Strengthening thinking skills through problem-solving learning.

- C. 2- Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussion and dialogue.
- C.4 Encouraging students to connect knowledge of human anatomy to their work as a dentist

Methods of Teaching and Learning

- Lectures that research and teach students about ways to confront and solve problems.
- Keep track of how students think, how they make expression, and how quickly they respond.
- Practical lessons on anatomical models.

Assessment methods

- Theoretical examinations.
- Practical examinations.

<u>D-</u><u>General and gained skills (Other skills related to employability and personal development)</u>

D-1- Student preparation in practice in terms of applying knowledge gained in human anatomy to their work. D.2-Considering problem solving.

D.3- Education of professional ethics.

D.4- Student skills to become a dentist capable of treating patients

D.5- Development of student capacity to deal with multiple means to learn.

13. Educational Institution	AL-Kitab University
14. University Department/Centre	College of Dentistry
15.Name of Academic Programme/ Code	Medical Terminology / 102MT
16. Programme included	Medical Terminology

17.Academic Study System	Lectures
18.Semester/Year	The first and second semesters of the first stage
19.Hours of Study (total)	30 theoretical hours
20.Preparation Date of this Description	2022-2021.

21. Objectives of the Academic Programme

The scientific preparation of the students in relation to the medical terminology, for their study to be able to use and understand all medical terms as dentists.

22. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Gaining knowledge of medical terminology
- A.2 Focusing on the terms used during the years of study
- A.1 Focusing on the terms used in dentistry.

B. Programme Skill Objectives

B.1 - Be able to speak in the language of dentists using their own terms.

B.2 - Gaining full knowledge of the medical terminology of dentistry.

B.3 -

Methods of teaching and learning

- Academic Course using lectures (data show) (power point)
- Providing students with some websites to use them.

Assessment methods

- Theoretical exams.
- Oral examinations.
- Quiz examinations.

C-Thinking Skills

- C.1 Strengthening thinking skills through problem-solving learning.
- C.2 Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussions and dialogues.
- C.4 Encouraging students to connect knowledge of medical terminology to their work as dentists.

Methods of teaching and learning

- Lectures that research and teach students about ways to confront and solve problems.
- Keep track of how students think, how they make expression, and how quickly they respond

Assessment methods

- Theoretical exams.

D- General and gained skills (Other skills related to employability and personal development). D1_____ practically preparing the students for applying knowledge gained in medical terminology in their work.

- D2____considering solving problems. D3 ____teaching professional ethics.
- D3 ______teaching professional ethics.

D4___Students gained skills to become dentists capable of treating patients. D9___

developing students capacity to work with multiple learning means and tools.

Required bibliography: • The basic texts • Course book • Other	
Special requirements (including, for example, workshops, seminars, software and websites)	Take advantage of the lectures published on the faculty site
Social services (for example, guest lesson, professional training and practical courses)	The study includes training on the use of dental terms

25. Educational Institution	AL-Kitab University				
26.University Department \ Centre	College of Dentistry				
27.Name/Code of the Academic Course	Computer Sciences /103CS				
28. The name of the final certificate	Computer Sciences				
29. Available Academic Courses	Laboratories				
30.Academic Study System	The first and second semesters of the first stage				
31.Number of hours (total)	60 practical hours				
32. Preparation Date of this Description	2022-2021.				
33. Objectives of the Academic Programme:					

Introduction into computer science and students learn the performance of computers, supported methods, software and learn using computers in the medical field

34. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1- Teaching the students ways to use the computer

A.2- How to use the software applications

B. Programme Skill Objectives

B.1- Teaching students the functions of computer use

B.2- Using Medical computer

Methods of Teaching and Learning

- Educational methods include uses of computers
- Guidance of students on some websites to use them.

Assessment Methods

- Practical examinations
- Short examinations.

C-Thinking Skills

- C.1- Enhance thinking skills through problem-solving learning.
- C.2 Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussion and dialogue.
- C.4 Encouraging students to connect the use of computers and technology to their work of dentists.

Methods of Teaching and Learning

- Lectures that assess student research and instruction on ways to confront and solve problems
- Following up the way the students think, how they make expression and how quickly they respond and react.

Assessment Methods

- Practical examinations

D. General and gained skills (Other skills related to employability and personal development).

- D.1 Students are practically prepared in terms of applying the use of the computer in their work.
- D.2 Considering problem solving.
- D.3 Gaining professional ethics.
- D.4 Skills acquisition of students to become experienced in using information technology. D.5
- Developing student capacity to work with multiple learning tools and means.

10. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1- Formulating and programming information in such a way as to enable the students to understand it and to increase their knowledge regarding the theoretical and practical aspects
- A.2- Introducing the students to the anatomical model of the teeth
- A.3-
- A.4-
- A.5-
- A.6-

B. Programme Skill Objectives

B.1 _ Providing students a dental carving training on wax moulds based on age-specific measurements

Methods of Teaching and Learning

Data show, lecture, LCD, educational movies and transverse cameras.

Assessment methods

Theoretical, practical (clinical) and quiz exams

C-Thinking Skills

- C.1- to be able to solve problems
- C.2- to be capable of leadership

C.3-

C.4-

Methods of Teaching and Learning

Theoretical and practical lessons (stimulus and response)

Assessment methods

Examinations

D. General and gained skills (other skills related to employability and personal development).

D.1- Student preparation in practice in terms of applying knowledge gained in dental anatomy into work

- D.2- Student development of methods of discussion and dialogue.
- D.3-

D.4-

University Department \ Centre	Basic Science Branch
The name/code of the Academic Programme	Medical Chemistry/ CH 106
Programme included	Medical Chemistry and Human Health

Approved Accreditation Programme	Lessons and laboratories
Academic Programme/year Tw	> semesters of the first stage

Number of hours (total)	60 theoretical hours and 60 practical hours	
Preparation Date of this Description	2022-2021	

Objectives of the Academic Course

Introduction into medical chemistry, general, organic and biochemistry

33. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1- Teaching students the relationship of general and non-organic chemistry to human beings

A.2- Understand the variables that occur when changes of concentration of materials to the body's health A.3- The relationship of acid and base measures in blood and their effects on organ functions A.4- Buffer solutions and their effects

A.5 - Pollution and its impact on human health and environment

A.6 - Radiation Chemistry and the effects of radiation on human health.

B. Programme Skill Objectives

B.1 - Depending on the teaching method used, e.g., lesson discussion and questioning.

B 2 - Use laboratories and practical experiments to increase student understanding and use them in practice B

3 - Methods of exams and assessments.

Methods of Teaching and Learning

The teaching method changes depending on student understanding and interaction with the lesson. A discussion, investigation or inference methods are used. All methods may be used at the same time, as well as using laboratories and practical experiments to increase student understanding and awareness.

Assessment Methods

Monthly examinations, quizzes, student attendances, in addition to their interaction with the subject and their participation and discussion during lectures and lessons.

53

C-Thinking Skills

- C.1-Investigation
- C.2- Discussion
- C.3- Laboratory experiments and reports
- C.4- Induction

Methods of Teaching and Learning

All methods of education used such as PowerPoint, presentation, laboratory reports as well as experiments, and all the process mentioned above

Assessment Methods

Monthly assessment methods, oral and final examinations, short examinations and laboratory reports and through

attendance and absence records

D. General and gained skills (Other skills related to employability and personal development).

- D.1-Annual updating and development of lectures
- D.2- Follow-up of published research on the subjects in relevance.
- D.3- Conducting quarterly and annual researches through personal and collective efforts and publish them in Arab and global magazines.

D.4-Discussion of the curriculum with the relevant and competent persons in order to reach the best of them.

41. Academic Course/Year	Two semesters / first stage
42. Number of hours (total)	60 theoretical hours and 60 practical hours
43. Preparation Date of this Description	2022-2021

44. Objectives the Academic Course:

enabling students to learn about the physical ideas related to the human body in two ways: Physical functions of organs of the human body and medical applications in diagnosis and treatment are described and applied.

Theoretical and practical mastery of the prescribed curriculum vocabulary

45. Programme outputs and teaching, learning and assessment

methods A. Cognitive Objectives (Knowledge and Understanding)

- A. 1–Physics relationship to humans
- A. 2- physical effects within the human body
- A. 3- physical applications on the human body in diagnostic and therapeutic methods
- A.4- improvement of the performance of the human body by physical means
- A. 5– All this information relates to human health.

A.6–

B. Programme Skill Objectives

- B.1- Lessons and discussion to consolidate ideas
- B.2 Experiments, laboratories and reports.
- B.3-
- B.4-

Methods of Teaching and Learning

Data Show

Assessment Methods

Quarterly exams, quizzes, and student attendance, student work in the classroom and interaction with the lessons

C. Thinking Skills

- C.1- Oral questions as a basis for discussion
- C.2- Practical experiments
- C.3- Laboratory reports
- C.4- Homework.

Methods of Teaching and Learning

All learning methods used such as lessons, assignments, reports and discussion panels.

Assessment Methods

Practical, theoretical, disciplined examinations within the lessons.

D. General and gained skills (other skills related to employability and personal development).

D.1- student preparation of theory and practice for doing tasks as required.

- D.2-
- D.3-
- D.4-

2	2	Physics of the skeleton: Bones:(Function of bones, composition of bone, bone remodelling, compact and trabecular bone) Stress-strain curve:(compressive and tensile stress, young modulus). Bone joints:	Physics	A theore tical lesson using Power Point	Short, quarterly, half-year and final exams

		(Synovial fluid, coefficient of a joint).			
3	2	Heat and cold in medicine:	Physics	A theoretical lesson using Power Point	Short, quart erly, half- year and final exam s
4	2	Energy, work and power of the body: Work and power. Efficiency heat losses from the body. Anaerobic phase and aerobic phase. Hypothalamus (body's thermostat). Heat lost by (radiation, convection,	Physics	A theoret ical lesson using Power Point	Short, quarterly, half-year and final exams

		evaporation of sweat and respiration).			
5	2	Energy, work and power of the body:	Physics	A theoret ical lesson using Power Point	Short, quart erly, half- year and final exam s

Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
6	2	Pressure:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
7	2	Pressure:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
8	2 Electricity within the body: Physics A theoretical lesson using Power Point		Short, quarterly, half-year and final exams		
9	2	Electricity within the body:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
10	2	Sound in medicine: Ultrasound (A- scan, B- scan, M- scan and Doppler effect). Physiological effect of ultrasound in therapy.	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
11	2	Sound in medicine: Ultrasound (A- scan, B-scan)	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
12	2	Sound in medicine: Ultrasound (A- scan, B- scan)	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
13	2	<i>Physics of the ear and hearing:</i> Defective vision, audits correlation (short and long sight, Astigmatism, contact lenses, glasses prescription. Colour vision and chromatic aberration (colour blindness, purkinje effect, and ocular chromatic aberration). Ophthalmoscope.	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
14	2	Physics of the ear and hearing:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
15	2	Light in medicine:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
16	2	Light in medicine:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
17	2	Laser in medicine What is laser?	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
18	2	Physics of diagnostic X- ray:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
19	2	Physics of diagnostic X- ray:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
20	2	Physics of diagnostic X- ray:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
21	2	Physics of diagnostic X- ray:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
22	2	Physics of nuclear medicine:	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
23	2	Brach therapy, quality factor (QF).	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
24	2	Principles of radiation therapy.	Physics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

25	2	The dose units (Rad and Gary).	Physics	A theoretical lesson using	Short, quarterly, half-year and final
				Power Point	exams
		Physics of radiation therapy:	Physics	A theoretical	Short, quarterly,
26	2			lesson using	half-year and
				Power Point	final exams
		Radiation protection	Physics	A theoretical	Short, quarterly,
27	2			lesson using	half-year and final
				Power Point	exams
		Radiation effects of ionizing radiation	Physics	A theoretical	Short, quarterly,
28	2			lesson using	half-year and
				Power Point	final exams
		Radioactive materials (Radon gas).	Physics	A theoretical	Short, quarterly,
29	2			lesson using	half-year and
				Power Point	final exams
		Pollution: Natural occurrence of	Physics	A theoretical	Short, quarterly,
30	2			lesson using	half-year and
				Power Point	final exams

Required bibliography:

- The basic texts
- Course books
- Other

Medical Physics John Cameron Other non-systematic books of assistance

Special requirements (including, for example, Workshops and seminars (Seminars) to discuss various workshops, seminars, software and websites) subjects in medical chemistry

Social services (for example, guest lesson and professional training, and practical Academic Courses)

Laboratory sessions

No.	Title of the sessions	Hours
1	Focal length of a concave mirror.	2
2	Laser application for measurements of single slit width	2
3	Laser application for measurements of laser wavelength	2
4	Divergence of laser beam	2
5	Intensity of laser beam	2
6	Widening the bundle of laser rays	2
7	Cathode ray oscilloscope to measure D.C voltage	2
8	Cathode ray oscilloscope to measure A.C voltage	2
9	Viscosity of a liquid using small sphere	2
10	Viscosity of a liquid using different small sphere weight	2
11	Viscosity of different kind of liquids using small sphere	2
12	Ohm's law to calculate unknown resistance	2
13	Ohm's law for metal wire with different length	2
14	Ohm's law for metal wire with different section area	2
15	The focal length of a convex lens	2
16	Pendulum Measuring the acceleration of free fall	2
17	Pendulum Measuring the acceleration of free fall of different spheres	2
18	Semiconductors (Junction diode).	2
19	Boyle's law	2
20	Hook's law to determine the force constant of the spring	2
21	Hook's law to determine the work done by the stretching the spring	2
22	Velocity of the sound using tube of water	2
23	Velocity of the sound using tube of different liquids	2
No.	Title of the sessions	Hours
24	The focal length of a converging lens.	2
25	Measuring the intensity of radiation	2
26	Specific heat capacity of water	2
27	Specific heat capacity of solid	2
28	Latent heat of vaporization	2
29	Archimedes principle	2
30	Thermal conductivity	2
Total		60

48. Educational Institution	Ministry of Higher Education and Scientific Research

49. University Department/Centre	Science Department, Basic Science
50. The name/code of the Academic Programme	Biology / BL 108
51. Programme included	Biology and its relationship to human health
52. Available Academic Courses	Student attendance is 100% for all academic year
53. Academic Study System/Year	Two semesters / first stage
54. Number of hours (total)	60 theoretical hours and 60 practical hours
55.Preparation Date of this Description	2022-2021.
56.Objectives of the Academic Programme	

Access to biology and understanding of its various branches such as parasites, cell science, tissues and genetics

57. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1- Student learning the relationship of life sciences to human beings

A.2- Understand the impact of life science on body health

A.3- The relationship of parasitology and cell science to human diseases

A.4-The relationship of genetics to human health

A.5- The relationship of tissue science to human beings A.6-

Relationship of cell science to blood

B. Programme Skill Objectives

B.1 – Depending on the teaching method used, e.g., lecture discussion, questioning.

B.2 - Use laboratories and practical experiments to increase student understanding and learn this in practice B.3

- Method of surprise exams and quizzes

Methods of Teaching and Learning

The teaching method changes depending on student understanding and interaction with the lesson. A discussion, investigation or inference methods are used. All methods may be used at the same time, as well as using laboratories and practical experiments to increase student understanding and awareness.

Assessment methods

Monthly examinations, short and surprise exams and student attendance. In addition to their interaction with the subjects and their activities during the lessons

C. Thinking Skills

C.1 - Investigation

- C.2 -Discussion
- C.3 Laboratory experiments and reports C-
- 4 Induction

Methods of Teaching and Learning

Monthly examinations, short, quarterly, half-year, final exams, laboratory reports and through attendance and absence records.

D. General and gained skills (Other skills related to employability and personal development.)

- D.1 Annual development of lectures
- D.2 Follow-up of published research on the subjects studied
- D.3 Undertake quarterly and annual research through personal and collective efforts and publish them in Arab and global magazines
- D.4 -Discuss the curriculum with those people of knowledge and competence in order to reach the best results

12. The development of the curriculum plan

 Development of academic content by deletion, addition and replacement. Using modern methods of teaching appropriate to the level of learners from time to time Updating the assessment methods and measuring the level of students. 					
11. Infrastructure					
1.Books Required reading	Headway intermediate level				
2. Main references (sources)	Headway intermediate level				
A- Recommended books and references (scientific journals, reports)					
B-Electronic references, Internet sites					

Promote e-learning. Adding new level to the curriculum like academic writing.

1. Educational Institution	Higher Education - College of Dentistry
2. University Department/Centre	College of Dentistry, Prosthesis
3. The name/Code of the Academic Programme	209DM
4. Programme included	Dental Material
5. Academic Study System	Student attendance at lectures and laboratories
6. Academic Course/Year	Two semesters/ second stage
7. Number of hours (total)	30 theoretical hours and 60 practical hours

8. Preparation Date of this Description	2022-2021.			
9. Objectives of the Academic Programme				
Learn the physical, chemical and mechanical properties of materials in dentistry and learn the skills to handle and				

Learn the physical, chemical and mechanical properties of materials in dentistry and learn the skills to hand adapt these materials.

74

10. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Student learning of various types of materials involved in dentistry
- A.2 Providing the necessary information to deal with these materials
- A.3 Providing guidance and following up on the process of using materials from mixing and following up the interactions of the material to reach the end of the interaction.

B. Programme Skill Objectives

- B.1 describing the tools used to prepare enough materials
- B. 2- teaching the students how to use it and following it up while working

Methods of Teaching and Learning

LCD, lesson, show data, live explanation and handling all types of materials listed in the curriculum. The Academic Course sets that the students are divided into groups on the number of days for week

Assessment methods

Weekly, monthly, half-year and annual examinations

C. Thinking Skills

- C.1 Ability to solve problems
- C.2 Ability to deal with dental materials in various conditions, such as changing temperature or changing the ratios for mixing these materials altogether to reach the best results of them.

C.3 -

Methods of Teaching and Learning

Theoretical and practical lessons (stimulus and response) Observing student response in the halls of practical demonstration

Assessment methods

Theoretical examinations

D. General and gained skills (other skills related to employability and personal development).

D.1- Teaching students the method of dialogue and discussion to solve dilemmas and problems.

Week	Theoretical Content	Hours	Teaching Method	Assessment Method
------	---------------------	-------	-----------------	----------------------

1	Introduction to dental materials, physical, mechani- cal, chemical and biological properties of dental materials	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half- year and final exams. For the laboratory, practical exams
2	 Gypsum product Definition, requirement, types: gypsum bonded investment phosphate bonded investment ethyl silicate bonded (composition, properties and manipulation) 	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction	Short, Quarterly, half- year and final exams. For the laboratory,
			with lectures, and direct handling of dental materials	exams

Week	Theoretical Content	Hours	Teaching Method	Assessment method
3	Investment materials factors affecting setting time, setting ex- pansion, strength, storage and manipula- tion of gypsum products, hygroscopic expansion. table with properties	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half-year and final exams. For the laboratory, practical exams
	Impression materials		For the theoretical	

4	Definition Ideal properties of impression materials. Classification of impression materials. Non elastic impression materials Impression plaster	1	approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half-year and final exams. For the laboratory, practical exams
5	 Impression compound Zinc oxide-eugenol 	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half-year and final exams. For the laboratory, practical exams
6	Elastic impression material	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half-year and final exams. For the laboratory, practical exams
7	Elastomeric impression material	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lectures, and direct handling of dental materials	Short, Quarterly, half-year and final exams. For the laboratory, practical exams

Week	Theoretical Content	Hours	Teaching Method	Assessment Method

17	Properties of heat cure Composition of chemically acti- vated resin Compared to heat activated res- ins Light activated resin Composition Processing errors	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams

18	Waxes Definition, Requirements, classification of wax according to origin & melting point, classification of wax according to uses proper- ties of dental waxes.	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams
19	Temporary filling Definition, indication, Requirements, Types	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams
20	Cements Classification of dental cements, Definition, Requirements	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams
21	Tissue conditioner Definition, Types, Require- ments, indication. Soft liners Types: Requirements, indica- tion, properties	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams
22	 Polishing and Abrasives Definition, factors affecting finishing and polishing, Types, and indication for each. Denture cleaners: Types, Requirements 	1	For the theoretical approach, the teaching method includes preparation of lessons by Power Point For the lab, it includes live explanation, interaction with lecturers, and direct handling of dental materials	Short, quarterly and final theoretical exams. For the laboratory, practical exams

Laboratory sessions

No.	Title of the sessions	Hours
1	Introduction and physical properties of dental material	2
2	Mechanical properties (stress strain curve)	2
3	Showing different types of gypsum materials (plaster, stone)	2
4	Steps of mixing plaster and demonstrate the steps of setting.	2
5	Impression plaster, demonstrate the manipulation of impression compound	2
6	Zinc oxide impression material and agar impression \demonstrate the mixing of zinc oxide impression.	2
7	Alginate impression (elastic impression) showing the trays used and the mixing of alginate and water according to manufacturer instructions.	2
8	Poly sulphide, condensation and addition silicon/mixing of heavy body and light body.	2
9	Poly ether, hybrid impression, digital impression.	2
10	Showing different types of wax (denture base plate, denture casting wax and others)	2
11	Demonstrate how to use wax material and its manipulation.	2
12	Introduction to polymers.	2
13	Different types of denture base materials (heat, cold and light activated polymers) demon- strate the mixing of polymer and monomer.	2
14	Thermoplastic polymers (flexible denture base material).	2
15	Investment materials (showing the method of the investment).	2
16	Introduction to cement materials.	2
17	Showing different types of cement materials and the method of mixing of cement.	2
18	Temporary filling (use and manipulation).	2
19	Introduction to metal and metal alloy.	2
20	Showing the different types of metal and metal alloy.	2
21	Introduction to crown and bridge material.	2
22	Introduction to filling material.	2
23	Amalgam filling\showing the amalgam capsules and mixing of amalgam.	2
24	Composite filing (chemical and light activated).	2
25	Micro filled, hybrid, and nano composite.	2
26	Demonstrate the setting of chemical and light activated composite filling material	2
27	Showing different types of preventive materials (toothpastes, gargles. Mouth wash fluoride varnishes and resin sealers).	2
28	Demonstrate the obstructing materials (gutta percha, sealers) and endodontic instruments.	2
29	Finishing and polishing materials.	2
30	Relining materials.	2
Total		60

Special requirements (including, for example, workshops, seminars, software and websites)				
Social services (for example, guest lesson and professional training, and practical Academic Courses)				

61. Educational Institution	Higher education - College of Dentistry
62. University Department/Centre	College of Dentistry, Prosthesis
63. The name/code of the Academic Programme	210PR
64. Programme included	Prosthodontics
65. Available attendance formats	Student attendance at lectures and labs
66. Semester /Year	Two semesters/ Second Stage
67. Number of hours (total)	30 theoretical hours and 120 practical hours
68. Preparation Date of this Description	2022-2021

69. Objectives of the Academic Programme

- Generally, the introduction of dental material, is one of the most important materials that students will continue to study for the next four years
- The definition of terms that will be used to explain the Academic Course so that students can understand them correctly
- The practical laboratory steps for making dentures and practical laboratory trainings are used and to adapt the materials used in making dentures.

70. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- giving the necessary information to deal with materials involved in manufacturing prosthodontics and making complete dentures.

- Providing students with full knowledge, which enable them to master all laboratory steps to for making complete dentures.

B. Programme Skill Objectives

- B.1- Describing the Academic Courses, equipment and materials for making denture
- B.2-. Teaching students how to use them and following them up step by step while working.

Methods of Teaching and Learning

LCD, lesson, show, data digital cameras, live explanation and handling all the types of materials listed in the curriculum in front of the students after they are divided into groups on the number of days of the week, and all the steps explained in details.

Assessment methods

Practical assessment of each step of the denture making process Weekly, monthly, half-year and annual examinations.

C. Thinking Skills

C.1 - solve problems

- C.2 able to handle and adapt dental materials with the complete skill to facilitate and master the laboratory of making denture and to respond to student questions and inquiries
- C.3 Live explanation, detailed sacrifice and direct interaction
- C.4 in the making of the denture, students will face difficulties due to their interaction with each other. Firstly, with the dentistry materials, which stimulates student creativity in making dentures.
- C.5 providing work atmosphere and group instructions, which gives students a good environment, that help and alert them to the gaps and errors that they may have made.

Methods of Teaching and Learning

Theoretical lectures, training and practical explanation. Observing student response within the demonstration rooms

Assessment methods

Theoretical examinations

Evaluate each steps of their dentures- making

21	4	Evaluation, arrangement of posterior teeth and carving of posterior palatal seal.	Prosthodontics	Practical laboratories	Quarterly, half-year and final practical and oral exams
22	4	Demonstration about carving and waxing of upper complete denture.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
23	4	Evaluation, carving and waxing of lower complete denture.	Prosthodontics	Practical laboratories	Quarterly, half-year and final practical and oral exams
24	4	Flasking and investment of the denture.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
25	4	Wax elimination, packing and curing of heat cure acrylic.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
26	4	Deflasking, finishing and polishing of upper complete denture.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
	4	Deflasking, finishing and polishing of lower complete denture.	Prosthodontics	Practical laboratories	Quarterly, half-year and

27					final practical and oral exams
28	4	Demonstration of selective grinding.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
29	4	Repair of fracture denture.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams
30	4	Repair of missing tooth.	Prosthodontics	Practical laboratories	Quarterly, half- year and final practical and oral exams

72. Infrastructure

Required bibliography: • The basic texts • Course books • Other	 Syllabus of complete denture (textbook of complete denture) Dental laboratory technology for removable prosthodontics Iraqi virtual library 4.
Special requirements (include, for example, work- shops, seminars, software and websites) Educational laboratories are also for students in the second stage, with all the basics and principles of making complete denture.	
Social services (for example, guest lesson and professional training, and practical Academic Courses)	Student participation at the annual faculty conference

73. Educational Institution	Ministry of Higher Education and Scientific Research
74. University Department/Centre	Dentistry
75. The name/Code of the Academic Programme	Embryology 211EL
76. Programme included	Dentistry
77. Academic Study System	Theoretical lectures and practical labs
78. Academic Programme/Year	Two semesters /second stage
79. Number of hours (total)	30 theoretical hours and 60 practical hours
80. Preparation Date of this Description	2022-2021

Objectives of the Academic Programme

Introducing the students to the stages of formation and development of the fetus and understanding the congenital anomalies associated with this development.

81. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1- Stages of development of the embryo
A.2 - Distortions that occur during the development of the embryo A.3 - Modern methods for diagnosing distortions
A.4 A.5 A.6 -

B. Programme Skill Objectives

B.1- Ability to dissection of laboratory animals (and extract embryos from them)

B.2 - Making slides with fetal slips

B.3 -

B.4 -

Methods of Teaching and Learning

Data show Seminar Anatomy by lecturers and students Engaging students in seminar discussions

Assessment Method

Daily and quarterly examinations Half-year and end-of-year exams Assessment of seminars

C. Thinking Skills

C.1 – Ability to extract embryos from laboratory animals

C.2 - Participation in the evaluation of other student seminars

C.3- Engagement of students in the development of a question for other groups C.4 -

Methods of Teaching and Learning

Data show Seminar Anatomy by teaching and Engaging students in seminar discussions

Assessment Methods

Daily and quarterly examinations

Half-year and end-of-year exams

Assessment of seminars

D. General and gained skills (other skills related to employability and personal development).

D.1 - Subject-specific videos Photos

Samples were brought by the students

D.2 -

D.3 -

D.4 -

84. Institution	Higher education and scientific research
85. University Department/Centre	Science – Basic Science
86. The name/Code of the Academic Programme	Biochemistry / BC 212

87. Programme included	Biochemistry and Human Health
88. Academic Study System	Lectures and labs
89. Academic Programme/Year	Two semesters/second stage
90. Number of hours (total)	60 theoretical hours and 60 practical hours
91. Preparation Date of this Description	2022-2021
92.Objectives of the Academic Programme	

Introduction to Biochemistry, understanding its functions, variables, irregular levels and input life, pathological, and methods for measuring their levels.

93. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 teach students the relationship of general and non-organic chemistry to humans
- A.2 understand the variables that occur when the material is changed to the body's health
- A.3 the relationship of acid and base to blood and its effects on organ functions
- A.4 solution and system for blading
- A.5 pollution and its impact on human health and the environment
- A.6 -radiation chemistry and radiological effects on human health

B. Programme Skill Objectives

- B.1 -Depending on the teaching method used, e.g., lecture discussion and making questions.
- B.2 Use laboratories and practical experiments to increase student understanding and see this in practice
- B.3 Method of surprise exams and quizzes.

Methods of Teaching and Learning

The teaching method changes depending on student understanding and interaction with the lesson. A discussion, investigation or inference methods are used. All methods may be used at the same time, as well as using laboratories and practical experiments to increase student understanding and awareness.

Assessment Methods

Monthly examinations, quizzes and student attendance, in addition to its interaction with the material and its activity during lessons.

C. Thinking Skills

- C.1 Investigation
- C.2 Discussion
- C.3 Laboratory experiments and reports
- C.4 Induction

Methods of Teaching and Learning

All education methods used such as Pure Point, presentation, laboratory reports as well as experiments, the process and above

Assessment Methods

Methods of monthly exams, oral and final examinations, short examinations and laboratory reports, attendance and absence records of class.

D. General and gained skills (Other skills related to employability and personal development).

- D.1 Updating and developing lectures annually
- D.2 Following-up of published research on the subjects
- D.3 undertaking quarterly and annual research through personal and collective efforts and publish them in Arab and global magazines
- D.4 Discussing the curriculum with relevant and competent persons in order to reach the best of them.

97. University Department/Centre	Basic Science				
98. The name/code of the Academic Programme	General Histology / GH 213				
99. Programme included	General Histology – Dentistry				
100.Available Academic Courses	Student attendance is 100% for all academic year				
101.Academic Study System/Year	Two semesters/ second stage				
102.Number of hours (total)	60 theoretical hours and 60 practical hours				
103.Preparation Date of this Description	2022-2021				
104.Objectives of the Academic Programme					
Students learn practical and theoretical applications of different body tissues and all body parts					

105. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 -Explain the structures of different tissues and organs of the body

A.2 -Use and draw simple diagrams on the board

A.3 -Use show data to view different segments of body organ tissues in several segments and directions.

A.4 -

A.5 -

A.6 -

B. Programme Skill Objectives

B.1 – Preparing tissue slice for different body segments

- B.2 Using optical microscopes to examine and distinguish different tissues and organs of the body
- B.3 -

B.4 -

Methods of Teaching and Learning

Interactive method

Assessment Methods

- 1. Short daily exams practical and theoretical exams
- 2. Quarterly, half-year and final examinations
- 3. Seminars and discussions in practical lessons

C. Thinking Skills

C.1 - View different parts of body organs and tissues and consider how to differentiate between them and their types.

C.2 -

C.3 -

C.4 -

Methods of Teaching and Learning

Assessment Methods

- 1. short daily exams practical and theoretical exams
- 2. Quarterly, half-year and final examinations
- 3. Seminars and discussions in practical lessons

<u>D</u> - <u>General and gained skills (other skills related to employability and personal development).</u>

- D.1 Periodic discussions in various tissue applications
- D.2 Using optical microscopes to examine and distinguish tissue from the body's organs
- D.3 Preparing microscopic clips for different parts of the body

D.4 -

107. Educational Institution	AL-Kitab University
108. University Department/Centre	College of Dentistry
109. The name/Code of the Academic Programme	Human Anatomy /101AN
110. Programme included	Anatomy of a human body
111. Available Academic Courses	Lectures and labs
112.Academic Study System /Year	The first and second semesters of the first stage
113. Number of hours (total)	30 theoretical hours and 60 practical hours
114 Preparation Date of this Description	2022-2021

115. Objectives of the Academic Programme

The scientific preparation of the students in relation to the human anatomy, especially in relation to the subject of study. The head and neck anatomy and its relationship to their speciality as a dentist

116. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Acquiring knowledge about human anatomy
- A.2 Focusing on the anatomy of the head and neck
- A.3 Relationship to their competence as a dentist.

B. Programme Skill Objectives

- B.1 Relationship of human anatomy to student work as a dentist.
- B.2 Gaining full knowledge of the organs of the human body.

B.3 -

Methods of Teaching and Learning

- Lectures using (Data show, power point)
- Instructional films.
- Student guidance on some websites to use them.
- Practical laboratory on anatomical models

Assessment Methods

- Theoretical exams.
- Practical examinations.
- Oral examinations.
- Quiz examinations

C. Thinking Skills

- C.1 Enhance thinking skills through problem-solving learning.
- C.2 Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussion and dialog.
- C.4 Encouraging students to connect knowledge of human anatomy to their work as a dentist

Methods of Teaching and Learning

- Lessons that research and teach students about ways to confront and solve problems.
- Keep track of how students think, how they make expression, and how quickly they respond.
- Practical lessons on anatomical models.

Assessment Methods

- Theoretical exams.
- Practical examinations.

D. General and gained skills (Other skills related to employability and personal development).

- D.1 Student preparation in practice in terms of applying knowledge gained in human anatomy to their work.
- D.2 Considering problem solving.
- D.3 Learning of professional ethics.
- D.4-Student gain skills to become a dentist capable of treating patients.
- D.5 Developing student capacity to deal with multiple learning means.

140. Preparation Date of this Description	2022-2021

141.Objectives of the Academic Programme

Introduction to Computer Science, where students learn the performance of computers, supported methods, software, and using computers medical fields

142. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Teaching the students ways to use the computer
- A.2 How to use software applications

B. Programme Skill Objectives

- B.1 Student instruction in computer use functions
- B.2 Medical computer use

Methods of Teaching and Learning

- Educational methods and computers
- Student guidance on some websites to use them.

Assessment Methods

- Practical examinations
- Quiz examinations

C. Thinking Skills

- C.1 Enhance thinking skills through problem-solving learning.
- C.2 Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussion and dialogue.
- C.4 Encouraging students to connect the use of information technology to their work of dentists

Methods of Teaching and Learning

- Lessons that assess student research and instruction on ways to confront and solve problems
- Continue the way the students think, how they make expression and how quickly they respond.

Assessment Methods

- Practical examinations

D. General and gained skills (Other skills related to employability and personal development).

- D.1 The student is practically prepared in terms of applying the use of the computer in his or her work.
- D.2 Considering problem solving.
- D.3 Teaching of professional ethics.
- D.4 The student acquired skills to become an expert with using information technology.
- D.5 Developing student capacity to work with multiple learning tools.

149. Available Academic Courses	Theoretical lectures and laboratories
150. Academic Study System/year	Two semesters/ Second stage
151. Number of hours (total)	30 theoretical hours and 60 practical hours
152. Preparation Date of this Description	2022-2021

153. Objectives of the Academic Programme

to qualify dentists who can identify the types of oral and dental tissues, learn the technique of cutting tissues of the mouth and teeth in the laboratory, how to use the photomicroscope and tissue slicing devices and know the types of pigments used to dye different mouth tissues

154.Learning outputs and methods of teaching, learning and evaluation

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Enabling students to use the photomicroscope and cut the tissues of the mouth and teeth

- A.2 Enabling students to know the types of natural oral tissues by giving enough information about the types of microscopes used to study the histology of the clutopia and the types of tissue layers
- A.3 -
- A.4 -
- A.5 -
- A.6 -

B. Programme Skill Objectives

- B.1 Know the different types of natural oral tissues by reading slides
- 1. Use the photomicroscope
- 2. How to slice different tissues of the mouth and teeth
- B.2 -
- B.3 -

B.4 -

Methods of Teaching and Learning

Theoretical Lectures using Data show LCD In-laboratories Slider Monitor

Assessment Methods

Quarterly + Quiz + Seminars Practical examinations

C. Thinking Skills

C.1 - Understand the importance of natural mouth tissue and how to chop it

C.2 -

C.3 -

C.4 -

Methods of Teaching and Learning

Continuing review of how they learn the types of mouth tissue by presenting them under the microscope

Assessment Methods

Practical in-laboratories exams. Show the slides to see how well they understand to use the photomicroscope and tissue slicing devices

D. General and gained skills (other skills related to employability and personal development).

D.1 - ability to diagnose tissue for oral tissue and fetal tissue

D.2 - ability to test laboratory equipment

D.3 -

D.4 -

163. Number of hours (total)	30 theoretical hours and 60 practical hours
164. Preparation Date of this Description	2022-2021
165. Objectives of the Academic Programme	

The scientific preparation of students in relation to the human anatomy, especially in relation to the subject of study.

The head and neck anatomy and its relationship to their competence as dentists.

166. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Acquiring knowledge about human anatomy

A.2 - Focusing on the head and neck anatomy

A.3 _ Relevance to their competence as dentists.

B. Programme Skill Objectives

B.1. - Relationship of human anatomy to student work as dentists.

B.2. - Gaining full knowledge of the organs of the human body.

B.3 -

Methods of Teaching and Learning

- Lectures using (Data show) (power point)
- Training videos
- Guiding students on some websites to benefit from them.
- Practical laboratory on anatomical models

Assessment Methods

- Theoretical exams.
- Practical examinations.
- Oral examinations
- Written examinations

C. Thinking skills

- C.1 promoting thinking skills through problem-solving learning.
- C.2 Gaining the basic principles of the learning curriculum.
- C.3 Developing student capacity for discussion and dialogue.
- C.4 Encouraging students to connect knowledge to human anatomy and acting as dentists

Methods of Teaching and Learning

- Lectures that evaluate student research and instruction on ways to confront and solve problems.
- Continue the way the student thinks, how they make expression and how quickly they respond.
- Practical lessons on anatomical models.

Assessment Methods

- Theoretical exams.
- Practical examinations.

D. General and gained skills (Other skills related to employability and personal development).

- D.1 Student preparation in the practice of terms of applying knowledge gained in human anatomy to their work.
- D.2 Considering problem solving.
- D.3 Teaching professional ethics.
- D.4- Student acquisition of skills to become a dentist capable of treating patients.
- D.5 Development of student capacity to deal with multiple means of learning.

3. The name/Code of the Academic Course	Biosafety and Biosecurity	
4. Academic Study System	One lecture every two weeks	
5.Academic Course/Year	Two semesters of second stage	
6. Number of hours (total)	15 theoretical hours	
7.Preparation Date of this Description	2022-2021	
8- Course aim Introduction to the science of safety and biosecurity and teaching the student how maintain on the safety of student, the institution and the society in general.		

8-Learning outcomes and methods of teaching, learning and assessment

A- knowledge and understanding

A1- Identifying of terminology of biosafety and security A2- Identifying of dangers of microbes and chemical materials inside the laboratories and medical clinics.

A3-Enable the student to possess sufficient knowledge about laboratory equipment and how to maintain it

B-Subject-specific skills

B1-Develop the student's ability to link between theoretical and practical information and analyze it to reach the best methods and results

B2- Enable the student to know the practical methods adopted in the management of laboratory equipment

B3- Contribute to reducing biological and chemical risks in scientific laboratories

B4- Training the student to manage sudden accidents in laboratories.

Teaching and learning methods

-Lectures by using [power point (data show)]

-Educational movies

- Guiding students to some websites to benefit from them.

- Practical lab

Evaluation methods

- -Theory exam
- -Practical exam
- Oral exam
- Quick exam

C- Thinking skills

C1- Enhance thinking skills through problem-based learning

C2- Acquire the basic principles stipulated in the learning curriculum

C3-Develop the student's ability on discuss and debate

C4- Develop the student's ability on success management for maintain on laboratories and general health.

Evaluation methods

-Theory exam

- Practical exam

D- General and transferable skills (other skills related to employability and personal

4. Course development). structure (Theoretical part)

D1-Preparing the student practically in terms of applying the acquired knowledge

9. Objectives of the Academic Programme

The aim of the microbiology lesson is to identify the principles of microbiology and epidemiological diseases, and this Academic Course aims to identify the characteristics of microbiology in general and the special characteristics of pathogenic microorganisms such as bacteria, fungi, viruses, and mechanics of pathology by these organisms and how to differentiate between each of these pathogens and the tests that they reveal. It aims to study the immune system, the mechanics of the body's defences and the immune response to diseases and look at ways of sterilisation

10. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding) A.1 -

Identify the microscopic organisms that are useful to humans A.2 -Identify the microscopic pathological life A.3 - Ways they can diagnose it (laboratory) A.4 - Identifying body immunity and types (Natural and acquired) A.5 - Relationship between human body and microorganisms in general A.6 -Identify methods of sterilisation

B. Programme Skill Objectives

- B.1 Learn modern methods of diagnosing pathological microbiology
- B.2 Identify microscopic organisms that cause new epidemics
- B.3 Multiple causes of various diseases

Methods of Teaching and Learning

Interactive methods

Assessment Methods

Long, short and quarterly examinations

C. Thinking Skills

- C.1 Diagnostic of the mechanism of pathogens by microorganisms
- C.2 Handling of epidemic pathogens (infectious)

<u>Methods of Teaching</u> and <u>Learning</u> Theoretical Lessons

Assessment Methods

Examinations

D. General and gained skills (other skills related to employability and personal development).

D.1 -student preparation in practice

D.2 _

D.3 -

189. Preparation Date of this Description	2022-2021	
00 Obissions of the Association Decomposition		

190. Objectives of the Academic Programme

Providing information to students about the identification of oral pathology and its measure in the community to achieve the goal of control and prevention in the community through preventive programmes.

191. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding) A.1 - Drafting information to

enable students to learn and understand them A.2 - Increasing student knowledge of ways to check teeth for decay and gum inflammation

A.3 - Giving instructions and advice for the correct placement of a dentist during screening and treating while sitting on Dental Chair

B. Programme Skill Objectives

- B.1 Gaining experience and information that helps them to identify the disease and know its causes
- B.2 Identifying the device for tooth and learn the correct position for patient and dentist when sitting on a Dental Chair
- B.3 -Methods of screening tooth decay, gum inflammation, microbial plaques and calcification of teeth that help it to be a successful dentist in their treatment with patients.

Methods of Teaching and Learning

- 1. Data Show
- 2. Educational Movies
- 3. LCD
- 4. Smart boards
- 5. Spin cameras
- 6. Electronic displays

Assessment Methods

- 1. Daily exams for practical/ theoretical subjects
- 2. Clinical examination
- 3. Quarterly exam
- 4. Semester exam
- 5. Final Exams

C. Thinking Skills

- C.1.- Assessment of social behaviour and student achievements
- C.2.- Prompting students to solve problems and having a distinct thinking
- C.3.- Qualifying students to lead teams to serve, treat and educate the community and patients

Methods of Teaching and Learning

Giving all information about oral diseases, especially those of the community, how to prevent them, and following up students through their expression, thinking, communication and response.

Assessment Methods

- 1. Doing daily and final exams for clinic, lecture and grading
- 2. Testing student response with an intuitive speed
- 3. Keeping up with their daily preparation

D. General and gained skills (other skills related to employability and personal development).

D.1.- Professional preparation and encouraging the student to behave positively in his or her daily

life D.2.- Scientific preparation and prompting student to communicate in other scientific areas

D.3.- Cultural preparation and student personal refinement

D.4 - Employment of skills gained so that the student becomes a dentist capable of treating patients

210. Available Academic Courses	Lectures, seminars, workshops and summer trainings
211. Academic Study System/year	Two semesters/Third stage
212. Number of hours (total)	30 theoretical hours and 60 practical hours
213. Preparation Date of this Description	2022-2021
214. Objectives of the Academic Programme:	
The aim of the programme is to qualify dentists who can	read and diagnose x-ray, can operate x-ray apparatus

correctly and have knowledge in dental radiology and able to deal with the risks of radiation.

215. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding) A.1 - To enable the

student to use the radiators correctly A.2 - explain the importance and risks of radiation protection and prevention A.3 - enable the students to read and diagnose radiological images of various types

A.4 - give adequate information on the latest types of equipment and diagnostic methods in the field of oral and maxillofacial x-rays.

D.2 -

A.5 -

A.6_

B. Programme Skill Objectives

B.1 -Reads radiological images
B.2 -Use of devices
B.3 -The ability to protect against radiation hazards
B.4 -

Methods of Teaching and Learning

Theoretical Lessons Scientific discussions and seminars using screens (LCD) Use of methods of clarification such as radiographs and videos

Assessment Methods

Weekly exams Mid-year and end-of-year exams The evaluation of the seminars prepared by the student Evaluation of the practical product

C. Thinking Skills

C.1 - Student integration with the subjects and beginning to consider solutions to address obstacles encountered in the Academic Course of the work

C.2 -

С.3 -

С. 4—

Methods of Teaching and Learning

Theoretical Lectures Scientific discussions and seminars using screens (LCD) Use of methods of clarification such as radiographs and videos

Assessment Methods

Weekly exams Half-year and end-of-year exams Assessment of the seminars prepared by students Assessment of the practical product

D – General and gained skills (other skills related to employability and personal development.)

D.1- Lecturers bring some sophisticated radiological image models that cannot be found within the Organisation. It is explained and presented to students for the purpose of keeping up with the scientific

Academic Course in the field of oral and maxillofacial x-rays. D.2 - D.3 - D.4–

225. Preparation Date of this Description	2022-2021

226. Objectives of the Academic Programme

To qualify dentists capable for identifying the important causes of different general pathologies, studying diagnosis of different pathologies and ways of using different pigments to know these pathologies and their causes.

227. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Ability to differentiate among different pathologies

- A.2 How to use pigment
- A.3 Learning on tissue slicing
- A.4 -

A.5 -

A.6 -

B. Programme Skill Objectives

B.1 - Ability to differentiate among different pathologies

- B.2 How to use pigments
- B.3 Learning on tissue slicing

B.4 -

Methods of Teaching and Learning

Theoretical Lessons Scientific discussions and seminars using screens (LCD) Use of methods of clarification such as radiographs and videos

Assessment Methods

Weekly exams Half-year and end-of-year exams Assessment of simians prepared by students Assessment of the practical product

C. Thinking Skills

C.1 - Identify pathologies and diagnose them microscopically using electron microscopy, dyes and tissue slicing.

- C.2 -
- C.3 -

C.4 -

Methods of Teaching and Learning

Theoretical lessons Scientific discussions and seminars Use of screens (LCD) on demonstration methods such as radiographs and videos

Assessment Methods

Weekly exams Half-year and end-of-year exams Assessment of simians prepared by the students Assessment of the practical product

D. General and gained skills (other skills related to employability and personal development).

D.1 _ Lecturers bring some tissue and dyes to rare diseases that cannot be found within the institution and are explained and presented to the students for keeping up with the scientific Academic Course in the field of public pathologies.

246. Available Academic Courses	Student attendance at lectures and laboratories
247. Academic Study System /Year	Two semesters/ stage 3
248. Number of hours (total)	30 theoretical hours and 60 practical hours
249. Preparation Date of this Description	2022-2021
250. Objectives of the Academic Programme	
Teaching basic principles related to the manufacture of	partial dentures, both acrylic and chrome cobalt

251. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Providing the students with the necessary information to make the students able to master all the steps of the micro dentures-making, especially, chrome cobalt related to the laboratory side

B. Programme Skill Objectives

- B1. describing the tools used to prepare enough materials
- B2. teaching students how to use and follow them up while working

Methods of Teaching and Learning

LCD lecture, data show, digital cameras, live explanation, direct student interaction with all types of materials listed in the curriculum presented to the student, after they are divided into groups on the number of days of the week and all the steps explain in details.

In addition to bringing in models of denture of previous patients or denture specially prepared for illustrations

Assessment Methods

Practical assessment of each step of the denture Weekly and monthly examinations, annual and annual text

C. Thinking Skills

- C.1 Ability to solve problems
- C.2 Ability to handle and adapt dental materials with complete skill to facilitate and master the laboratory of denture making and to respond to student questions
- C.3 Providing live and detailed explanation, and direct interaction
- C.4 In denture making lessons, students will face difficulties due to their interaction with the student dental materials that stimulate student creativity and talent in the denture making
- C.5 Providing work atmosphere and group instruction, which make the students in a sound psychological environment, which alert him to the potential mistakes they, or their mates may make.

Assessment Methods

Theoretical examinations

Assessment of each step of the denture's work and assessment of the treatment plans as well as the designs the students have developed for various pathological conditions.

D. General and gained skills (other skills related to employability and personal development).

D.1 -Encouraging and motivating students to participate in conferences both inside and outside the faculty and in external trainings.

Required bibliography: • The basic texts • Course books • Other	McCracken textbooks Laboratory procedures for RPD Dental technology
Special requirements (including, for example, workshops, seminars, software and websites)	As mentioned above, laboratories and practice step-by-step, where all the practical steps are explained by lecturers and then are assessed for each step.
Social services (for example, guest lesson and professional training, and practical Academic Courses)	Participation in faculty conferences and lectures by Dental Industry Association and participating in the making illustrative images and flexes.

254. Educational Institution	Ministry of Higher Education and Scientific Research
254. University Department/Centre	Branch of Oral, Maxillofacial and Dental Surgery
255. The name/code of the Academic Programme	General Medicine/ 423GM
256. Programmes included	Dentistry
257. Available Academic Courses	Theoretical and practical lectures
258. Academic Study System /Year	Two semesters/ Fourth Stage
259. Number of hours (total)	30 theoretical hours and 75 practical hours
260. Preparation Date of this Description	2022-2021

261. Objectives of the Academic Programme:

to prepare students at a high level of scientific knowledge in relation to general medicine and learning of the treatment of diseases and their diagnosis, treatment and their relationship to their competence as dentists

263. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Gaining knowledge of human diseases

A.2 - Ways to diagnosing diseases and treating them

A.3 - The relationship of diseases to their competence as a dentist.

A.4 -

A.5 -

A.6 -

B. Programme Skill Objectives

B.1 - Special diagnostic methods

B.2 - Knowledge of laboratory types of pathology.

B.3 -

B.4 -

Methods of Teaching and Learning

Lessons using Power Point (data show) and clinical tours in the Department of Internal Medicine

Assessment Methods

Quarterly, half-year, final and short exams.

C. Thinking Skills

- C.1 Solve problems in dealing with pathology.
- C.2 -
- C.3 -
- C.4 -

Methods of Teaching and Learning

Theoretical lectures and clinical tours

Assessment Methods

Quiz quarterly, half-year and final exams

D. General and gained skills (other skills related to employability and personal development).

- D.1 Student preparation in practice in dealing with general medicine and its relationship with their work as a dentist.
- D.2 -
- D.3 -
- D.4 -

297. Objectives of the Academic Programme

Student are trained on screening patients and diagnose the condition with modern diagnostic methods adopted, preparing the treatment plan, start the treatment using modern materials and methods to root canal treatment by giving theoretical lesson with working in the clinics.

Students are also trained in root canal treatment on extracted teeth to prepare them for clinical work on patients.

298. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

A.1 - Train the student on how to examine and diagnose pathological conditions

A.2 - Provide important information and treatment steps

A.3 - Give guidance and follow up on the processes of the root canal treatment.

A.4 -

A.5 -

A.6 -

B. Programme Skill Objectives

B.1 - Describing the tools used to prepare for root canal treatment and fillings.

B.2 - Teaching the students how to use the tools and following them up while working

Methods of Teaching and Learning

Data show, lecture, LCD, educational movies and transverse cameras

Assessment methods

2	1	Objectives of endodontic treatment Basic phases of treatment Pulp pathologies 	Conserva tive Dentist ry	A theoreti cal lesson using Power Point	Short, quart erly, half- year and final exam s
3	1	Biologic Considerations of Enamel structure and its Clinical Significance in Practice of	Conserva tive Dentist ry	A theoretic al lesson using Power	Short, quarterly, half-year and final
				Point	exams

4	1	Classification of periapical diseases	Conserva	A theore tical lesson using Power Point	Short, quart erly, half- year and final exam s
5	1	Operative Dentistry (part 1)	tive Dentistr y	theoretic al lesson using Power Point	quarterly, half-year and final exams
6	1	Access opening preparation	Conserva tive Dentist ry	A theore tical lesson using Power Point	Short, quart erly, half- year and final

					exam s
7	1	Biologic Considerations of Dentin structure & its Clinical Significance in Operative Dentistry (part 2)	Conserva tive Dentistr y	A theore tical lesson using Power Point	Short, quart erly, half- year and final exam s
8	1	Endodontic instruments	Conserva tive Dentist ry	A theore tical lesson using Power Point	Short, quart erly, half- year and final exam s
9	1	Dentin Bonding, Current strategies for Adhesion of Resin to Dentin. Expanded Clinical Indications for Dentin Adhesives	Conserva tive Dentistr y	A theore tical lesson using Power Point	Short, quarterly, half-year and final exams

Week	Hours	Theoretical content	Academic	Teaching	Assessment
			Course name	Method	method
10	1	Roentgenography in endodontics and root ca- nal preparation	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
11	1	Patient Evaluation, Diagnosis & Treatment Planning (part 1)	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
12	1	The rubber dam and its applications	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
13	1	Patient Evaluation, Diagnosis & Treatment Planning (part2)	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

14	1	 Techniques in root canal preparation 1. Conventional technique 2. Step back technique 3. Crown down technique Errors in root canal preparation 	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
15	1	Caries Management (Diagnosis & treatment strategies) The treatment goal in caries	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
16	1	Obscuration of root canals Lateral condensation	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
17	1	Caries Management (Diagnosis & treatment strategies) Pit & fissure lesions Lesions involving proximal surfaces. Lesions in smooth free surfaces Root caries	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

Week	Hours	Theoretical content	Academic	Teaching	Assessment
			Course name	Method	method
18	1	Biological consideration of enamel and den- tin, its practical significant in operative den- tistry	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
19	1	Caries Management (Diagnosis & treatment strategies) New Detection Devices. Treatment of the Lesion or Cavity: - Causal, non-invasive, or preventive treatment - Symptomatic (invasive or restorative) treatment. New technologies for caries removal & cavity preparation.	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
20	1	Cervical Lesion Non-carious cervical lesions((Erosion, Abrasion, Abreaction)	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
21	1	Restorative Dentistry and Pulpal Health	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

22	1	Inflammatory Conditions of the Pulp	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
23	1	Treatment of Deep-Seated Caries (part 1)	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
24	1	Treatment of Deep-Seated Caries (part 2)	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
25	1	Fluoride–Releasing Matera	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final theoretical exams
26	1	 Laser Definition. Laser apparatus. Properties of laser light. Mechanisms of laser tissue interactions. Types of lasers in dentistry. 	Conservative Dentistry	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
Week 27	Hours 1	Theoretical content Application of Laser in Restorative Dentistry.	Academic Course name Conservative Dentistry	Teaching Method A theoretical lesson using Power Point	Assessment method Short, quarterly, half-year and final exams
Week 27 28	Hours 1	Theoretical content Application of Laser in Restorative Dentistry. Direct tooth-coloured restorations (Composite) Direct Composite Veneers Advantages of posterior composite restorations. Disadvantages of direct posterior composite restorations.	Academic Course name Conservative Dentistry Conservative Dentistry	Teaching Method A theoretical lesson using Power Point A theoretical lesson using Power Point	Assessment method Short, quarterly, half-year and final exams Short, quarterly, half-year and final exams

Clinical requirements

Operative Dentistry	Hours
The students are required to complete the	2.5h/wk.
following restorations:	
a. Amalgam Restoration	
Class I 6 cases, Class II 4 cases.	
b. Composite (tooth coloured) Restorations	
Class III 2, Class IV 2, and Class	
V 2cases	
These requirements are the absolute minimum	
needed in order to take the final examination.	75h/year

Clinical requirements (Preclinical Endodontic)

No.	Title of the sessions	Hours
1	Introduction	2.5
2	Block construction	2.5
3	Diagnosis	2.5
4	Quiz 1 in lab 1,2&3 +Access opening	2.5
5	Quiz 2 in lab 4 +Clinical access opening to one anterior tooth and two premolar teeth	2.5

Required bibliography: • The basic texts • Course books • Other	 Endodontics, Ingle. Art & Science of operative dentistry. Pathways of the pulp by Seltzer. Handbook of Endodontics by Bunce.
Special requirements (including, for example, workshops, seminars, software and websites)	Clinics
Social services (for example, guest lesson and professional training, and practical Academic Courses)	The educational programme includes vocational training in den- tal education, training in diagnosis and treatment, as well as hosting some experienced professors to give lectures for presen- tation of their experience in scientific research and treatment.

301.Educational Institution	Ministry of Higher Education and Scientific Research/ AL-Kitab University
302. University Department/Centre	College of Dentistry/ Oral Diagnosis
303. The name/code of the Academic Programme	Oral Pathology / 425OP
304. Programmes included	Dentistry
305. Available Academic Courses	Lectures, seminars, workshops and summer trainings
306. Academic Study System/Year	Two semesters/fourth stage
307. Number of hours (total)	60 theoretical hours 150/ practical hours
308. Preparation Date of this Description	2022-2021

309. Objectives of the Academic Programme

To qualify dentists who can identify the causes of various oral pathology, study diagnosis and methods of dental pigments to know the distinction between diseases through laboratory diagnosis.

310. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding) A.1

- Ability to differentiate between different mouth diseases A.2
- How to use pigment
- A.3 Learn tissue slicing
- A.4 -
- A.5 -
- A.6 -

B. Programme Skill Objectives

- B.1 Ability to differentiate between different mouth diseases
- B.2 How to use pigments
- B.3 Learn tissue slicing

В. В.4 -

Methods of Teaching and Learning

Theoretical Lessons Scientific discussions and seminars Using LCD screens Using methods of clarification such as microscope and video

Assessment Methods

Weekly exams Half-year and end-of-year exams

C. Thinking Skills

C.1 - Identifying diseases, micro diagnostics, dyes and tissue slicing

C.2 -

C.3 -

C.4 -

Methods of Teaching and Learning

Theoretical Lessons Scientific discussions and seminars Using LCD screens Using methods of clarification such as microscope and video

Assessment Methods

Weekly exams Half-year and end-of-year exams

D - General and gained skills (other skills related to employability and personal development.)

- D.1 Lecturers will bring some tissue slices and dyes to rare diseases that cannot be found within the institution and explained and presented to students for the purpose of keeping up with the scientific Academic Course in the field of oral pathology
- D.2 -
- D.3 -
- D.4 -

320. Preparation Date of this Description	2022-2021	
321. Objectives of the Academic Programme:		
Preparing students for having a high level of scientific knowledge in relation to dental assessment and identifying		
types of periodental conditions of nations and their causes, and types of orthodontic appliances and tools		

types of periodontal conditions of patients and their causes, and types of orthodontic appliances and tools.

322. Programme outputs and teaching, learning and assessment methods A. Cognitive Objectives (Knowledge and Understanding) A.1 - Gaining knowledge of the causes of poor bite A.2 - Ways to diagnose and treat them A.3 - Identifying the types of orthodontic appliances A.4 -A.5 -A.6 -B. Programme Skill Objectives B.1 - Learn how to make movable orthodontic appliances with its different parts B.2 -B.3 -B.4 -Methods of Teaching and Learning Lectures using PowerPoint (data show) Laboratory trainings on making movable orthodontic device Assessment Methods Short, quarterly, half-year and final exams C. Thinking Skills C.1 - Solving problems of poor bite. C.2 -C.3 -C.4 -**Methods of Teaching and Learning** Theoretical lectures and practical laboratories **Assessment methods** Short, quarterly, half-year and final exams D. General and gained skills (other skills related to employability and personal development). D.1 _Practical preparation of students for using the movable orthodontic device. D.2 -D.3 -D.4 -

323. Academic Course structure

We	Hour	Theoretical content	Academic	Teaching	Assessment
ек	5		Course name	Method	method
1	2	Introduction Definition of orthodontics Definition of occlusion, normal occlusion, ideal occlusion and malocclusion Six keys of normal occlusion	Orthodo ntics	A theoretic al lesson using Power Point	Short, quarterl y, half- year and final exams
2	2	Aims of orthodontic treatment	Orthodo ntics	A theoretical lesson using Power Point	Short, quarterl y, half- year and final exams

		Orthodontic definitions (overjet, overbite, cross bite, spacing, crowding, midline devia- tion, rotation, displacement, proclamation, retroclination, protrusion, retrusion, imbrica- tion, overlap impaction) – including types			
3	2	Classification of malocclusion a. Angle's classification including divi- sion and subdivisions	Orthodo ntics	A theore tical lesson using Power Point	Short, quarterl y, half- year and final exams
4	2	b. molar, canine, incisor classifications	Orthodo ntics	A theoretical	Short, quart erlv.
		c. classification of deciduous and mixed		using	half-

		dentitions		Power Point	year and final exa ms
5	2	Growth and development Definitions of growth, development and ma- turity Stages of development (ovum until birth) Theories of bone growth (cartilaginous, su- tural, endosteal-periosteal, matrix theories)	Orthodo ntics	A theore tical lesson using Power Point	Short, quarterl y, half- year and final exams

Week	Hours	Theoretical content	Academic	Teaching	Assessment
			Course name	Method	method
6	2	Definitions of growth site, growth centre, displacement, and drift Growth curve and maximum growth spurt	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
7	2	Growth and development of hard tissues (cranial base, cranial vault, nasomaxillary complex, mandible) including prenatal and postnatal Growth and development of soft tissues (lip, nose, cheek and tongue) including prenatal and postnatal	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
8	2	Developmental anomalies Jaw rotation and adaptation	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
9	2	Deciduous and permanent dentition Stages of tooth development: Formation, calcification and root completion	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
10	2	Tooth eruption (stages and theories) Sequences and timing of eruption	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
11	2	 Development of occlusion new-born oral cavity (relationship of gum pads, neonatal jaw relationships, natal and neonatal teeth) Deciduous dentition stage -Dental changes till 6 years of age (jawrelationship, attrition, primary spaces) 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

Week	Hours	Theoretical content	Academic	Teaching	Assessment
			Course name	Method	method
12	2	 Early mixed dentition stage - eruption of first molars and incisors (occlusal relationships of primary and permanent molars, early mesial shift, ugly duckling stage, secondary spaces) Late mixed dentition stage – eruption of canines and premolars (Leeway space and late mesial shift) Permanent dentition–eruption second and third molars (mesial migra- tion) 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half- year and final exams
13	2	Etiology of malocclusion: Genetic factors and inherited factors Classification of etiological factors a. General factors i. Skeletal (dental base and cranial base, variation of position and size of the jaws)	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
14	2	 ii. Soft tissue (muscles of face and mastication, Muscles of lip and tongue, relation to skeletal factors, abnormalities of orofacial musculature, interference with soft tissue function) iii. Tooth size and arch length relationship (Crowding and spacing) including types 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half- year and final exams

Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
15	2	 b. Local factors: i. Extra-teeth(supernumerary) and missing teeth (hypodontia) ii. Anomalies of tooth size and shape 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
16	2	 iii. Early loss of deciduous teeth iv. Retained deciduous teeth, de- layed eruption of permanent teeth, impacted teeth, ankylo- sis 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
17	2	v. Abnormal eruptive behaviour	Orthodontics	A theoretical	Short, quarterly,

		(displacement, transposition)		lesson using	half-year and
		vi. Large frenum (labial and lin- gual), periodontal diseases		Power Point	final exams
18	2	vii. Oral habits viii. Dental caries, improper den- tal restoration	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
19	2	 Tooth movement a. Tissue changes associated with tooth movement: i. Histology of periodontium ii. Theories of tooth movement (pressure tension theory, blood flow theory, and piezoelectric theory) 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
20	2	 b. Biomechanics (application, type, magnitude, duration and direction) Force Centre of resistance and rotation, moment of force and moment of couple. 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
21	2	iii. Types of tooth movementiv. Rate of tooth movement and factors affecting it	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half- year and final exams
22	2	Orthodontic appliances a. <u>Overview:</u> i. passive orthodontic applianc- es (habit breaker, retainer and space maintainer) ii. active orthodontic appliances (removable, fixed, orthopae- dic and myofunctional, and combination)	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
23	2	b. <u>Removable Orthodontic Appliance:</u> i. Properties of various compo- nents (SS wire, acrylic) ii. Components: 1) Active components (springs, screws and elas- tics)	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half- year and final exams
24	2	 retentive components (clasps) acrylic base plate and bite 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

		planes 4) anchorage			
25	2	iii. Design of removable ortho- dontic applianceiv. Construction of a removable orthodontic appliance	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half- year and final exams

Week	Hours	Theoretical content	Academic Course name	Teaching Method	Assessment method
26	2	v. Soldering and weldingvi. Post-insertion instructions and guidelines	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
27	2	c. <u>Fixed orthodontic appliance:</u> Types, components, advantages, limitation, biomechanics, banding vs. bonding	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
28	2	Use of extra-oral anchorage, temporary an- chorage devices (TADs), and lingual fixed appliance	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
29	2	 d. <u>Orthopaedic and Myofunctional</u> <u>appliance:</u> Types, components, advantages, limita- tion, mode of action <u>Other active appliances:</u> Combination appliances, Invisalign 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams
30	2	 f. <u>Retention and retainers</u> Retention (definition, reason, time) Retainers (Hawley, clear overlay, position- ers, permanent fixation, precision) 	Orthodontics	A theoretical lesson using Power Point	Short, quarterly, half-year and final exams

12. Infrastructure

Required bibliography: • The basic texts • Course books • Other	 Contemporary orthodontics Textbook of orthodontics Orthodontics; current principles and technique 	
	4. Introduction to orthodontics	
Special requirements (including, for example, workshops, seminars, software and websites)	Students prepare reports on various subjects in the field of the study under the supervision of the lecturers of the subjects and holding seminars).	
Social services (for example, guest lesson and professional training, and practical Academic Courses)

327. Programmes included	Dentistry
328. Available Academic Courses	Theoretical lectures
329. Academic Study System /Year	Two semesters/fourth stage
330. Number of hours (total)	30 theoretical hours
331. Preparation Date of this Description	2022-2021

332. Objectives of the Academic Programme

understand the theoretical and practical ways to treat all cases of children teeth and to learn about scientific methods and methods supported by means of illustration to learn how to identify the brown and permanent teeth and the problems associated with them.

333. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Drafting information to enable students to understand them
- A.2 Increasing knowledge regarding the diagnosis and treatment of various pedodontics dentistry in children
- A.3 Caring for mouth and teeth, and promoting awareness of the importance of maintaining the deciduous teeth until the permanent teeth are formed in children.

B. Programme Skill Objectives

- B.1 Training students in pathological conditions of teeth of children
- B.2 Giving instructions on how to deal with children conditions
- B.3 Acquiring skills to diagnose the deciduous and permanent teeth of children

Methods of Teaching and Learning

- 1. Data Show
- 2. Educational Movies
- 3. LCD
- 4. Transverse cameras

Assessment Methods

- 1. Attendance
- 2. Daily, short and quiz exams
- 3. Quarterly exams
- 4. Semester exam
- 5. Final Exam
- 6. Making questions and discussions during lectures

C. Thinking Skills

C.1 - Student ability to solve problems and have distinctive thinking

- C.2 -Ability to lead student groups
- C.3 -Assessing student achievements

Methods of Teaching and Learning

Following up the student thinking, expression and responsiveness methods

Assessment Methods

- 1. depending on the student attendance and commitment to the lectures and their interaction with the lecturers
- 2. taking the short exams to assess student understanding of the subject presented and explained in the lecture
- 3. taking planned exams as the quarterly, half and final exams.

D. General and gained skills (other skills related to employability and personal development).

- D.1 -Professional preparation
- D.2 Scientific preparation
- D.3 -Cultural preparation
- D.4 -Employing skills gained so that the student becomes a dentist capable of treating patients

244 Objectives of the Assignmin Durgers	1
544. Objectives of the Academic Programme	

- The main objective of the branch is to increase the health awareness of the health of the mouth and teeth in the citizens and to treat the patients who suffer from periodontics by preparing medical staffs of students who will perform this role after they have graduated and served in health centres all over Iraq.
- 2. Pedagogy: By giving lectures, holding seminars and performing advanced surgical operations for the purpose of training students.
- 3. The therapeutic and preventive aspect: The branch currently covers all pathological cases of periodontal disease referred to the faculty as well as the preventive aspect of this subject

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 -Formulate information in such a way that students can understand and increase knowledge regarding diagnosis, treat and continue with various periodontal disease.
- A.2 Giving students instructions on oral and dental care for patients visiting the College of Dentistry
- A.3 Students have knowledge of all means of health education of patients to prevent, diagnose and treat periodontal diseases.

B. Programme Skill Objectives

- B.1 Training students to remove plaque from the teeth and remove discolouration from the teeth
- B.2 Giving instructions for oral health care
- B.3 Learning the preventive aspect to prevent periodontal disease and prevent the development of periodontics from getting worse.

Methods of Teaching and Learning

- A.1 Data show
- A.2 Educational Movies
- A.3 LCD
- A.4 Electronic screens
- A.5 Transverse cameras
- A.6 Smart Specs

Assessment Methods

Written and oral examinations, quiz and clinical examinations

C. Thinking Skills

- C.1 Student ability to solve problems and have distinctive thinking
- C.2 Ability to lead student groups
- C.3 Assessing student achievements

Methods of Teaching and Learning

Follow up the student thinking, expression and responsiveness methods by using all available learning methods such as show data, tutorials, electronic screens and more.

Assessment Methods

Preparation of reports, theoretical and practical examinations and grading

D. General and gained skills (other skills related to employability and personal development).

- D.1 Professional preparation
- D.2 Scientific preparation
- D.3 Cultural preparation
- D.4 Employing skills gained so that the students become dentists capable of treating patients

346. Academic Course structure					
Week	Hours	Academic Course name	Theoretical content	Teaching Method	Assessment method

29	1	Periodontics	Maintenance phase	A theoretical lesson using Power Point	Practical, short, quarterly, half-year and final exams
30	1	Periodontics	Drugs in periodontology	A theoretical lesson using Power Point	Practical, short, quarterly, half-year and final exams

347. Infrastructure	
Required bibliography: • The basic texts • Course books • Other	Book for Linda 2009 and Crianza 2012
Special requirements (including, for example, work- shops, seminars, software and websites)	Continuation of holding educational academic courses and seminars
Social services (for example, guest lesson and profes- sional training, and practical Academic Courses)	Holding seminars for periodontal disease of patients on health awareness raising and prevention of periodontal disease.

Clinical requirement

Clinical requirement	Type of treatment
2.5h/week 75h/year	Scaling & polishing min.= 4000 points max.=7000 points

348. Educational Institution	Higher Education - College of Dentistry
349. University Department/Centre	Prosthodontics
350. The name/code of the Academic Programme	410PR
351. Programmes included	Prosthodontics (Dentistry)
352. Available Academic Courses	Lectures and clinics
353. Academic Course/year	Two semesters / fourth stage
354. Number of hours (total)	30 theoretical hours and 150 practical hours
355. Preparation Date of this Description	2022-2021

356. Objectives of the Academic Programme:

Student are trained on screening patients and diagnose the pathological condition patients through modern, currently approved diagnostic methods and then create a treatment plan, and then start treatment scientifically and use modern materials and methods in the micro denture making by giving theoretical lessons with practice in clinics.

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Training the student on how to examine and diagnose pathological conditions.
- A.2 Providing important information and treatment steps.
- A.3 Providing guidance and follow up on the process of the partial denture making.

B. Programme Skill Objectives

- B.1. Describe the tools used to treat patients in need of partial dentures
- B.2. Practical practice of steps to treat patients in need of partial dentures
- B.3 Following up students during their work

Methods of Teaching and Learning

Intensive practical training within the Dental Teaching Hospital LCD lessons, data show, Smart interactive boards, illustrative films and discs.

Assessment Methods

Theoretical and practical exams (clinical.) Each student is asked to do a certain number of cases of a flexible or acrylic partial denture and a wide range of cases, including easy, intermediate and difficult cases. Case Sheet

C. Thinking Skills C.1. -

Problems -solve

- C.2.- Capability of leadership
- C.3 Create the spirit of scientific competition between students by direct and indirect questions relating to various cases of dentistry
- C.4 Encourage student to self-development through self-esteem and ongoing training

Teaching and learning methods

Theoretical lectures and practical training.

Assessment Methods

The theoretical and practical examinations, also, the requirements of treatment, which are the number of cases to be treated on a correct, professional and complete basis, are counted to be part of the requirements of the annual work, besides the graduation project.

D. General and gained skills (other skills related to employability and personal development.

D.1 - Student motivation for participation in training Academic Courses and conferences held within and outside the faculty, at the syndicate and at the Iraqi Orthodontic Society.

389. Number of hours (total)	30 theoretical hours and 150 practical hours
390. Preparation Date of this Description	2022-2021

391. Objectives of the Academic Programme

Preparing students for a high level of scientific knowledge in relation to the principles of Oral, Maxillofacial and Dental Surgery, especially benign and malignant tumours, orthopaedic surgery, facial injuries, maxillofacial and dental implants.

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Acquiring basic knowledge of the principles of Oral, Maxillofacial and Dental Surgery.
- A.2 Gaining basic knowledge of dental implantability.
- A.3 -
- A.4 -
- A.5 -
- A.6 -

B. Special skills

- B.1 Dental extraction trainings
- B.2 Minor dental surgery trainings
- B.3 Surgical diagnosis trainings
- B.4 Introduce students to the principles of dental implantation and the use of lasers in oral surgery

Methods of Teaching and Learning

Lessons using Power Point (Data show)

Dental and Micro-Operations Clinics and Surgeon Diagnosis Seminars preparation by students under the supervision of their lecturers

Assessment Methods

Quarterly, half-year, final and short exams and practical exams

C. Thinking Skills

- C.1 Dealing with oral surgery, dental extractions and complications related to them
- C.2 Developing student researches aspects
- C.3
- C.4

Methods of Teaching and Learning

Theoretical lessons, dental extraction clinics, minor operations and surgical diagnosis

Assessment methods

Theoretical, practical exams and seminars

D. General and gained skills (other skills related to employability and personal development.)

D.1 - Student preparation in practice in relation to oral surgery, local anaesthesia, tooth extraction and diagnosis of oral, maxillofacial and dental diseases and dental implants.

D.2 -

D.3 -

D.4 -

398. Programmes included	Dentistry
399. Available Academic Courses	Theoretical lectures
400. Academic Study System/Year	Two semesters/fifth stage
401. Number of hours (total)	30 theoretical hours and 75 practical hours
402. Preparation Date of this Description	2022-2021

403. Objectives of the Academic Programme

understand the theoretical and practical ways to treat all cases of children teeth and to learn about scientific methods and methods supported by means of illustration to learn how to identify the brown and permanent teeth and the problems associated with them.

A. Cognitive Objectives (Knowledge and Understanding) A.1 -

Drafting information to enable students to understand them.

- A.2 Increasing knowledge regarding the diagnosis and treatment of various pedodontics dentistry in children
- A.3 Caring for mouth and teeth and promoting awareness of the importance of maintaining the deciduous teeth until the permanent teeth are formed in children.

B. Programme Skill Objectives

- B.1 Training students in pathological conditions of teeth of children
- B.2 Giving instructions on how to deal with children conditions
- B.3 Acquiring skills to diagnose the deciduous and permanent teeth of children

Methods of Teaching and Learning

- 1. Data Show
- 2. Educational Movies
- 3. LCD
- 4. Transverse cameras

Assessment Methods

- 1. Attendance
- 2. Daily, short and quiz exams
- 3. Quarterly exams
- 4. Half-year exams
- 5. Final exams
- 6. Making questions and discussions during lectures.

C. Thinking Skills

- C.1 Student ability to solve problems and have distinctive thinking
- C.2 -Ability to lead student groups
- C.3 -Assessing student achievements

Methods of Teaching and Learning

Following up the student thinking, expression and responsiveness methods

Assessment Methods

- 1. Depending on the student attendance and commitment to the lectures and their interaction with the lecturers
- 2. Taking short exams to assess student understanding of the material presented and explained in the lecture
- 3. Taking planned exams as the quarterly, half and final exams.

D. General and gained skills (other skills related to employability and personal development).

- D.1 Professional preparation
- D.2 Scientific preparation
- D.3 Cultural preparation
- D.4 -Employing skills gained so that the student becomes a dentist capable of treating patients.

-------------------------------------------	-----------------------------------------
413. Number of hours (total)	30 hours theoretical 75 hours practical
415. Preparation Date of this Description	2022-2021

415. Objectives of the Academic Programme

The definition of the importance of preventive dentistry and its applications to individuals and society, especially for widespread diseases such as tooth decay and leprosy, as well as for nutrition and immune factors of oral pathology.

416. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 -The formulates information in a way that students can understand and increase knowledge regarding the diagnosis and treatment of various diseases such as dental caries
- A.2 -Giving guidelines for dental care and health education to prevent tooth decay and periodontal disease
- A.3 Providing special guidance and preventive programmes for oral and dental health to adults and people with special needs.

B. Programme Skill Objectives

- B.1 Training the student to treat tooth decay and remove the sediments from the teeth
- B.2 Training the student to be able to use fluoride for the apocalcius
- B.3 -Giving directions of care for mouth teeth health.

Methods of Teaching and Learning

Theoretical lessons using the LDC and data show Education Movies Practical lessons

Assessment Methods

- 1. Conducting daily quiz exams
- 2. Written and oral exams
- 3. Conducting clinical tests on patients
- 4. A practical assessment of the (Requirement)

C. Thinking Skills

C.1 - Acquisition of the main principles of the curriculum, as required.

C.2 -Ability of students to solve problems and have a distinct thinking

Methods of Teaching and Learning

- 1. Following up the way student thinks, how they make expression and how quickly they respond
- 2. Illustrative demonstration to the clinical treatment of patients

Assessment Methods

- 1. Daily oral and written examinations are held
- 2. Daily assessment of student performance in the clinic during patient treatments.

D. General and gained skills (other skills related to employability and personal development).

D.1 - None

D.2 -

D.3 -

D.4 -

426. Preparation Date of this Description	2022-2021

427. Objectives of the Academic Programme

Student are trained on examining patients and diagnose the disease of the patient through modern, currently approved diagnostic methods and make a treatment plan. Then, starting the treatment in a scientific way using modern materials and methods in making a complete denture, by giving theoretical lessons with practice in clinics

The practice of prosthodontics has continuous evolved as a result of progress in a laboratory and biomaterial science, clinical technologies and multidisciplinary advancements. There is a tendency of prosthodontists to assess their patient's treatment needs based on morphological consideration.

The objectives are to acquire:

- a) Knowledge
- b) Skills and
- c) Attitudes
- 1. Willing to applying the current knowledge of dentistry in the best interest of the patients and the community
- 2. Maintain a high standard of professional ethics and conduct, and apply these in all aspects of professional life, to examine, diagnose and formulate a treatment plan to deal with edentulous conditions by way of providing a suitable prosthesis.

428. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Training the students on how to examine and diagnose pathological conditions.
- A.2 Providing important information and treatment steps.
- A.3 Providing guidance and following up the process of making a complete and flexible denture and other conditions such as relining or rebasing the complete denture or repair it.
- A.4 Providing the students with the skills of dealing with patients with considering the difference of their psychological, mode and health conditions, because the dentist does not treat the teeth, which are in the mouth of the patient, but rather, treat the patient who has the teeth in their mouth.

B. Programme Skill Objectives

- B.1 Describe the tools used to treat patients in need of complete dentures
- B.2 Practical training on steps to treat patients in need of full-time basis.
- B.3 Follow-up of the students while they are on practical trainings in clinics
- B.4 Follow-up the students during their completion of the laboratory denture steps, because students are obliged to do all laboratory work steps in the laboratory of students of fourth and fifth stages, which is fully equipped with all materials and supplies needed.

Methods of Teaching and Learning

- Intensive practical training inside the Dental Teaching Hospital
- LCD, lecture, Data show, Smart boards, illustrative films and discs
- seminars
- group learning workshops
- Annual Conference of College of Dentistry
- Graduation Research
- Summer Trainings

Assessment Methods

C. Thinking Skills

- C.1 Ability to solve problems. C.2
- Ability of leadership
- C.3 Encouraging the spirit of scientific competition between students by making direct and indirect questions relating to various cases of dental medicine
- C.4 Encouraging students for self-development through peers, ongoing trainings, attendance of workshops and continuing academic courses inside and outside the College of Dentistry.

Methods of Teaching and Learning

Theoretical and practical Lectures (stimulus and response)

Assessment Methods

The theoretical and practical examinations, also, the requirements of treatment, which are the number of cases to be treated on a correct, professional and complete basis, are counted to be part of the requirements of the annual work, besides the graduation project.

D. General and gained skills (other skills related to employability and personal development).

D.1 – The student motivation for participating in the Academic Courses and conferences held inside and outside the College of Dentistry.

438. Objectives of the Academic Programme:

To prepare students for having a high level of scientific knowledge in the diagnosis and treatment of the minor cases of poor bites using movable and functional appliances.

 439. Programme outputs and teaching, learning and assessment methods

 A. Cognitive Objectives (Knowledge and Understanding)

 A.1 - to gain knowledge of ways to diagnose and treat cases of poor bites

 A.2

 A.3

 A.4

 A.5

 A.6

 B. Programme Skill Objectives

 B.1 - to learn the special diagnostic methods

 B.2 - to learn the types of dental devices related to each case.

 B.3.

 B.4 -.

Methods of Teaching and Learning

Lessons using power point (data show) Training clinics to evaluate jaw and teeth

Assessment Methods

Short, quarterly, half-year and final exams

C. Thinking Skills

C.1 - The ability to solve the problem of bad dentures by using movable and functional devices.

- C.2 -
- C.3 -

C.4 -

Methods of Teaching and Learning

Theoretical lessons and medical clinics

Assessment Methods

Short, quarterly, half-year and final exams

D. General and gained skills (other skills related to employability and personal development).

D.1 -Prepare the students in practice for diagnosing and treating minor poor bites.

448. Preparation Date of this Description	2022-2021

449. Objectives of the Academic Programme

- 1. The main objective of the branch is to increase the health awareness of the health of the citizens' mouth and teeth and to diagnose and treat patients who suffer from periodontal diseases through the preparation of a medi- cal staff of the students who performs this role after their graduation and serve in the health centres, which are spread all over Iraq.
- 2. The educational aspect: By giving lectures, holding scientific seminars and performing advanced surgical operations for training students.
- 3. The therapeutic and preventive aspect: The branch currently covers diagnosis, treatment and follow-up of all pathological conditions related to a periodontal disease referred to the faculty as well as the preventive aspect of this subject.

450. Programme outputs and teaching, learning and assessment methods

A. Cognitive Objectives (Knowledge and Understanding)

- A.1 Formulate information in such a way as to enable students to understand and increase their knowledge regarding the diagnosis and treatment of various periodontal disease.
- A.2 -Giving students instructions on oral and dental care for patients visiting the College of Dentistry.
- A.3 -Students have knowledge of all means of health education of patients for the prevention of periodontal disease.

B. Programme Skill Objectives

- B1. Training students to remove sediments and internal and external discolouration from teeth and gum blading and learn to make some minor surgical interventions
- B2. Giving instructions for oral health care

B3. Learning the preventive aspect to prevent periodontal disease and to prevent the development of the periodontal disease from getting worse.

Methods of Teaching and Learning

- 1. Data show
- 2. Educational movies
- A3. LCD
- A4. Electronic screens
- A5. Transverse cameras
- A6. Smart boards

Assessment Methods

Perform written, oral and clinical examinations and short exams

C. Thinking Skills

- C1. Student ability to solve problems and have distinctive thinking
- C2. Ability to lead student groups
- C3. Assessing student achievements

Methods of Teaching and Learning

Following up the student thinking, expression and responsiveness methods by using all available ways of learning, such as data show, tutorials, electronic screens and more.

Assessment Methods

Preparation of reports, working and theoretical examinations and grading.

D. General and gained skills (other skills related to employability and personal development).

- D.1 Professional preparation
- D.2 Scientific preparation
- D.3 Cultural preparation
- D.4 Recruitment of skills gained so that the students have become dentists capable of treating patients.
