# Academic Program and Course Description Guide

#### the introduction:

The educational program is a coordinated and organized package of courses that include procedures and experiences organized into study modules. The primary purpose is to build and refine graduates' skills, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs, such as the External Examiner Program.

The academic program description provides a brief summary of the program's main features and courses, indicating the skills students are expected to acquire based on the program's objectives. The importance of this description is evident in that it represents the cornerstone for obtaining program accreditation. It is written by faculty members under the supervision of the academic committees in the academic departments.

This guide, in its second edition, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the new developments and changes in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, semester) in addition to adopting the description of the academic program circulated pursuant to the letter of the Department of Studies TM3/2906 dated 5/3/2023 with regard to programs that adopt the Bologna process as the basis for their work. In this context, we cannot but emphasize the importance of writing descriptions of academic programs and courses to ensure the smooth running of the educational process.

**Concepts and terms:** 

**Academic Program Description:** The academic program description provides a concise summary of the program's vision, mission, and objectives, including a detailed description of the targeted learning outcomes based on specific learning strategies.

**Course Description**: Provides a concise summary of the course's key features and the learning outcomes expected of the student, demonstrating whether the student has made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious vision for the future of the academic program to be .an advanced, inspiring, motivating, realistic, and applicable program

Program mission: It briefly explains the objectives and activities required to achieve them, and also identifies the program's development paths and directions.
Program objectives: These are statements that describe what the academic program intends to achieve within a specific time period and are measurable and

**Curriculum structure:** All courses/subjects included in the academic program according to the approved learning system (semester, annual, Bologna track) whether required by (ministry, university, college, or scientific department) with the number of academic units.

observable.

**Learning outcomes**: A consistent set of knowledge, skills, and values acquired by the student after successfully completing the academic program. The learning outcomes for each course must be determined in a way that achieves the .program's objectives.

**Teaching and learning strategies:** These are the strategies used by faculty members to develop student teaching and learning. They are plans followed to achieve learning objectives. They describe all classroom and extracurricular activities to achieve the program's learning outcomes.

#### **Academic Program Description Form**

University Name: Al-Kitab Private University

College/Institute: College of Science

School Department: Department of Mathematics

Academic or Professional Program Title: Mathematics

Final Degree Title: Bachelor of Science in Mathematics

Academic System: Bologna Path

Description Date: Date the University President approved the academic program description

File Completion Date: April 26, 2025

:Signature

Name of Department Head: Asst. Prof. Dr. Sufyan

Abbas Wahib Date: 12/1/2025 : Signature

Name of Academic Assistant Dr. Akram

:Hatem Shadar

:Date: 12/1/2025

File reviewed by

the Quality Assurance and University Performance Division

Name of the Director of: Dr. Salam Adel Ahmed

**Approval Of The Dean** 

#### 1. Program vision

Preparing qualified graduates in mathematics, capable of interacting with the requirements of the era and technology, and contributing to building Iraqi society on sound scientific, ethical and health foundations, supporting the research and development process in Iraq, and contributing to building a healthy society.

#### 1. Program message

Providing an educational and technical research environment that stimulates learning and creativity, contributing to the preparation of highly qualified graduates, achieving effective local and international scientific twinning, and strengthening partnerships with community sectors and international institutions in related fields.

#### 1. Program objectives

- 1. Providing graduates with the necessary scientific knowledge in mathematics, aiming to deepen their understanding of the methodology of analysis, criticism, and scientific research, and to use these skills to study and serve society in the health and education sectors.
- 2. Empowering graduates with practical and research skills that qualify them to excel and succeed in their professional lives, enabling them to enroll in distinguished graduate programs.
- 3. Enabling students to train and gain practical experience on a wide range of modern technologies and using advanced scientific equipment in various mathematical disciplines.
- 4. Increasing awareness of mathematics in society and its role in driving health, development, and national production.
- 5. Developing students' skills in using modern research resources to enable them to build essential scientific skills, such as scientific writing skills, discussion skills, constructive criticism, and scientific communication.

6. Developing the department to become a distinguished center for mathematical sciences research and graduate studies

Preparing students for positions in the industrial and government sectors, and in biological work fields, whether professional, research, or academic.

#### 1. Program accreditation

Is the program accredited? And by which authority? There is no program accreditation because the department was established in 2023-2024...and is twinned with a similar department at the University of Kirkuk.

#### 1. Other external influences

Is there a sponsor for the program

Ministry of Health, Ministry of Higher Education and Scientific Research

#### 1. Teaching and learning strategies

- 1. Teaching and learning strategies and methods adopted in implementing the program in general.
- 2. Incorporating various methods into the curriculum, highlighting the advantages and disadvantages of each method.
- 3. Incorporating real research problems into the curriculum (specific to the subject) to motivate students to express their opinions and propose solutions for the best approach to addressing problems and challenges.
- 4. Adopting a continuous improvement approach for all various activities and events to ensure the achievement of the college's mission and approved objectives, in accordance with quality standards (such as workshops and field trips).

#### **Evaluation methods**

.Implementing it in all stages of the program in general

- First, practical study:
- Student response through active participation in the lecture and group critique of student projects.
- Monitoring the presentation of the practical and theoretical project (which proceeds in stages leading up to the final stage) through individual and group critique and evaluation of each stage.
- Evaluating classroom tests and comparing the creative level of proposed solutions with the solutions of each student's annual projects.
- Group critique at the end of each project to assess the overall strengths and weaknesses of the students' solutions.
- Second, theoretical study:
- Student response through student participation during the discussion of information in lectures.
- Conducting midterm and final exams (which give instructors the authority to take additional exams in the event of a delay in a particular subject, to improve student results. The instructor is free to estimate the load for that exam compared to the rest of the exams. Exam results are presented to students for review and to learn from any errors that can be overcome).
- Final exam:
- Third: Summer Training:
- Appropriate training locations are selected to suit the department's specializations. Summer training is considered a basic requirement for a successful student's transition from the third to the fourth grade.
   Otherwise, the student must complete the training the following year to ensure their transition to the fourth grade.
- Fourth: Monitoring and tracking student progress:
- Student activity and participation during lectures.
- The student's level of interest in submitting additional assignments.
- The student's completion of academic reports that cover more in-depth topics than those required by the curriculum, broadening their horizons and training them in scientific research.
  - ✓ The student's eagerness to attend lectures despite various difficulties.
  - ✓ Through short surprise exams, the student's academic progress and comprehension of the course are evaluated.
    - ✓ A group of committees are formed each academic year to monitor student attendance and absences. Administrative orders are issued at alternating intervals regarding absence rates and warnings. The matter is followed up by the department head and the course instructor, in agreement with faculty members.

#### **Professional development**

#### Orientation of new faculty members

Briefly describe the process used to orient new, visiting, full-time, and part-time faculty members at the institutional and departmental levels.

Develop the curriculum by twinning it with the courses of similar departments in other colleges of (%80) science.

Adopt local design principles, such as sustainability and research, and apply them to student projects.

Participate in local and international conferences and specialized seminars under the .

#### Professional development for faculty members

Briefly describe the academic and professional development plan and arrangements for faculty members, such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

One-day internship with corresponding departments

#### 2. Acceptance criteria

Establishing regulations related to admission to the college or institute, whether through ) (.central admission or other procedures

Students are admitted to the college based on their grades in the sixth grade of middle school (baccalaureate). The criteria for assigning students to departments are determined :by

The student's desire •

The student's total score in the sixth grade •

The department's capacity •

The privilege offered by the student, as his or her father or mother is a teacher • • at the Ministry of Higher Education.

#### 2. The most important sources of information about the program

| Module Aims<br>أهداف المادة الدراسية                          | <ol> <li>Provide the fundamental base for elementary mathematics.</li> <li>Use mathematical functions like algebraic and transcendental functions and application of derivatives to solve mathematics, engineering and physics problems.</li> </ol>   |
| Module Learning<br>Outcomes<br>مخرجات التعلم للمادة الدر اسية | <ol> <li>Basic 2D curves drawing and lines using properties.</li> <li>Apply mathematic techniques to find the limits and continuous.</li> <li>Apply differential calculus and higher order to solve mathematics, engineering and Physics problems.</li> <li>Expanding on many of the functions that were taken in the previous stages.</li> <li>Learn about new functions and study their properties.</li> </ol>  |
|   | Chapter 1  Relations and functions, domain and range, operations on functions. Inverse functions, special function and graphs. Graphing linear equations, distance between two points and between point and line. The rate of change functions, increasing and decreasing functions. Slope and Equations for lines, functions and their graph. [18 hrs.]  Chapter 2   |
| Indicative Contents<br>المحتويات الإرشادية                    | Limits and continuity, introduction to limit, some properties of limits, limit involving infinity.  Formula definition of Limit. The Limits of rational functions. Some important Theorem on limits. Introduction to continuous functions, algebraic operations on continuous functions, properties of continuous functions.  [18 hrs.]  Chapter 3  Derivative of functions, derivative by using definition. Derivative of corner, Differentiation rules. Second and higher order derivatives. Chain rule, implicit differentiation.  [17 hrs.] |
|   | Chapter 4  Derivative of special functions and some properties of Transcendental functions, such as: Trigonometri functions, Natural logarithm function, Exponential function, Exponential and logarithmic function bases other than e, Hyperbolic functions, inverse of trigonometric functions, Inverse of hyperbolic functions L'Hopital's Rules. [18 hrs.]  Chapter 5   |

#### **Learning and Teaching Strategies**

#### استراتيجيات التعلم والتعليم

#### Strategies

The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering type of simple experiments involving some sampling activities that are interesting to the students. And knowing the basis of the concepts and where they came from and taking realistic applications on that.

## Delivery Plan (Weekly Syllabus)

## المنهاج الأسبوعي النظري

|            | Material Covered   |
|------------|--|
| Week<br>1  | Relations and functions, domain and range, operations on functions. Inverse functions,   |
| Week<br>2  | Special function and graphs. Graphing linear equations distance between two points and between point and line.   |
| Week<br>3  | The rate of change functions, increasing and decreasing functions. Slope and Equations for lines, functions and their graph.                                   |
| Week<br>4  | Introduction to limit, some properties of limits, limit involving infinity.  |
| Week<br>5  | Formula definition of Limit, The limits of rational functions. Some important Theorem on limits.   |
| Week<br>6  | Introduction to continuous functions, algebraic operations on continuous functions, properties of continuous functions.  |
| Week<br>7  | Mid-term Exam + Derivative of functions, derivative by using definition. Derivative of corner.   |
| Week<br>8  | Differentiation rules. Second and higher order derivatives. Chain rule, implicit differentiation.  |
| Week<br>9  | Derivative of special functions and some properties of Transcendental functions, such as: Trigonometric functions.   |
| Week<br>10 | Natural logarithm function, Exponential function, Exponential and logarithmic function bases other than e.   |
| Week<br>11 | Hyperbolic functions, Inverse of trigonometric functions, Inverse of hyperbolic functions, L'Hopital's Rules.  |
| Week<br>12 | Applications of derivatives: Related rates of change. Slopes and tangent lines with derivatives.   |
| Week<br>13 | Extreme values, Maximum and Minimum Theorems, Rolle's Theorem and Mean Value Theorem, Cauchy's Mean Value Theorem.   |
| Week<br>14 | Monotonicity test (Maximum and Minimum regions) Critical points, concavity and inflections points, Asymptotes, A curve sketching, Graphing Rational functions. |
| Week<br>15 | Engineering applications, Physical applications, Arithmetic applications, velocity, and acceleration with application.   |
| Week<br>16 | Preparatory week before the final Exam.  |

|-------|----------------|---------|--------------|-------------------------|--|--|--|
|       | مخطط الدرجات   |         |              |                         |  |  |  |
| Group | Grade          | التقدير | Marks<br>(%) | Definition              |  |  |  |
|       | A - Excellent  | امتياز  | 90 - 100     | Outstanding Performance |  |  |  |

|               | <b>B</b> - Very Good    | جيد جداً            | 80 - 89 | Above average with some errors        |
|---------------|-------------------------|---------------------|---------|---------------------------------------|
| Success Group | C - Good                | جيد                 | 70 - 79 | Sound work with notable errors        |
| (50 - 100)    | <b>D</b> - Satisfactory | متوسط               | 60 - 69 | Fair but with major shortcomings      |
|               | E - Sufficient          | مقبول               | 50 - 59 | Work meets minimum criteria           |
| Fail Group    | <b>FX</b> – Fail        | راسب (قيد المعالجة) | (45-49) | More work required but credit awarded |
| (0 – 49)      | <b>F</b> – Fail         | راسب                | (0-44)  | Considerable amount of work required  |
|               |                         |                     |         |                                       |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

#### **Grading Scheme**

مخطط الدر جات

| Group         | Grade                   | التقدير              | Marks    | Definition                            |
|---------------|-------------------------|----------------------|----------|---------------------------------------|
| Отоцр         | Grude                   | <i>J.</i>            | (%)      | Deminion                              |
|               | A - Excellent           | امتياز               | 90 - 100 | Outstanding Performance               |
| Success Group | <b>B</b> - Very Good    | جيد                  | 80 - 89  | Above average with some errors        |
| (50 – 100)    | C - Good                | جيد جيداً            | 70 - 79  | Sound work with notable errors        |
|               | <b>D</b> - Satisfactory | متوسط                | 60 - 69  | Fair but with major shortcomings      |
|               | E - Sufficient          | مقبول                | 50 - 59  | Work meets minimum criteria           |
| Fail Group    | <b>FX</b> – Fail        | ر اسب (قيد المعالجة) | (45-49)  | More work required but credit awarded |
| (0 – 49)      | <b>F</b> – Fail         | راسب                 | (0-44)   | Considerable amount of work required  |
|               |                         |                      |          |                                       |

Note: Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark ) for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker)s( will be the automatic rounding outlined above.

|---|--|--|--|--|--|
| Module Aim<br>اهداف المادة الدر اسية  | The aim of this module is to introduce students to some topics in the mathematics of combinatorial structures. This theory has wide applications, both in classical mathematics and in theoretical computer science.   |  |  |  |  |
| Module Learning<br>Outcomes<br>مخرجات التعلم للمادة<br>الدراسية                           | After successful completion of the module, students will be able to:  1. Understand and explain a variety of mathematical structures that do not involve infinite processes and limits.  2. Solve systems of linear equations.  3. Perform matrix operations.  4. Apply mathematical skills to practical problems such as input-output analysis, inventory planning, optimal production schedules, insurance |  |  |  |  |
| Indicative Contents<br>المحتويات االرشادية  |  |  |  |  |  |

| Learning and Teaching Strategies<br>استراتيجية التعلم والتعليم |  |  |  |  |
|--|--|--|--|--|
| Strategies   | Type something like: The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering the type of simple experiments involving some sampling activities that are interesting to |  |  |  |

| Delivery Plan (Weekly Syllabus)<br>المنهاج الأسبوعي النظري |   |  |  |  |
|--|---|--|--|--|
| Week   | Material Covered  |  |  |  |
| Week 1   | Definition of matrix, Operation on Matrices, Some type of Matrices.     |  |  |  |
| Week 2   | Determinants and their properties.                                      |  |  |  |
| Week 3   | Inverse of matrix, Invertible matrices.                                 |  |  |  |
| Week 4   | Adjoint matrices, elementary transformations.                           |  |  |  |
| Week 5   | Applications on matrices, Eigenvalues and Eigenvectors.                 |  |  |  |
| Week 6   | Standard Eigenvalue Problem, Kronecker Product and Eigenvalues.         |  |  |  |
| Week 7   | Approximating Eigenvalues.  |  |  |  |
| Week 8   | Diagonalization, Jordan Form.   |  |  |  |
| Week 9   | Fundamental concept, representing graph with matrices connected graphs. |  |  |  |
| Week 10  | Graph isomorphism, planar graphs, trees.                                |  |  |  |
| Week 11  | Binomial Expansion.   |  |  |  |
| Week 12  | The Additive and Multiplication Principles.                             |  |  |  |
| Week 13  | Permutations, Combinations.   |  |  |  |
| Week 14  | Random Samples.   |  |  |  |
| Week 15  | Tree Diagrams.  |  |  |  |
| Week 16  | Preparatory week before the final exam.                                 |  |  |  |

### **Grading Scheme**

### مخطط الدر جات

| Group         | Grade                   | التقدير             | Marks (%) | Definition                            |
|---------------|-------------------------|---------------------|-----------|---------------------------------------|
|               | A - Excellent           | امتياز              | 90 - 100  | Outstanding Performance               |
| Success Group | <b>B</b> - Very Good    | جيد جداً            | 80 - 89   | Above average with some errors        |
| )50 - 100(    | C - Good                | ختر                 | 70 - 79   | Sound work with notable errors        |
| , , ,         | <b>D</b> - Satisfactory | متوسط               | 60 - 69   | Fair but with major shortcomings      |
|               | E - Sufficient          | مقبول               | 50 - 59   | Work meets minimum criteria           |
| Fail Group    | FX – Fail               | راسب (قيد المعالجة) | (45-49)   | More work required but credit awarded |
| (0-49)        | <b>F</b> – Fail         | راسب                | (0-44)    | Considerable amount of work required  |
|               |                         |                     |           |                                       |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark) for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker (s) will be the automatic rounding outlined above.

# **Grading Scheme**

# مخطط الدرجات

| Group | Grade                | التقدير  | Marks (%) | Definition                     |  |
|-------|----------------------|----------|-----------|--------------------------------|--|
|       | A - Excellent        | امتياز   | 90 - 100  | Outstanding Performance        |  |
|       | <b>B</b> - Very Good | جيد جداً | 80 - 89   | Above average with some errors |  |

| Module A       | C - Good                | ختخ                 | 70 - 79 | Sound work with notable errors        |
|----------------|-------------------------|---------------------|---------|---------------------------------------|
| ة الدر اسية    | <b>D</b> - Satisfactory | متوسط               | 60 - 69 | Fair but with major shortcomings      |
| Module Learnin | E - Sufficient          | مقبول               | 50 - 59 | Work meets minimum criteria           |
| Fail Group     | <b>FX</b> – Fail        | راسب (قيد المعالجة) | (45-49) | More work required but credit awarded |
| (0-49)         | <b>F</b> – Fail         | راسب                | (0-44)  | Considerable amount of work required  |
|                |                         |                     |         |                                       |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark) for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker (s) will be the automatic rounding outlined above.

### **Learning and Teaching Strategies**

# استراتيجيات التعلم والتعليم

Strategies

The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering type of simple experiments involving some sampling activities that are interesting to the students. And knowing the basis of the concepts and where they came from and taking realistic applications on that.

### **Student Workload (SWL)**

### الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

| Structured SWL (h/sem)                      |     | Structured SWL (h/w)                     |   |

| الحمل الدر اسي الكلي للطالب خالل الفصل      | 175 |  |   |

### **Module Evaluation**

### تقييم المادة الدراسية

|            |             | Time/Number | Weight (Marks) | Week Due   | Relevant Learning Outcome |
|------------|-------------|-------------|----------------|------------|---------------------------|
| Formative  | Quizzes     | 3           | 10% (30)       | 5, 9, 13   | LO #1-3                   |
| assessment | Assignments | 5           | 1% (5)         | 2,4,6,8,10 | LO # 1-4                  |

|                  | Projects / Lab. |                 |          |    |          |
|------------------|-----------------|-----------------|----------|----|----------|
|                  | Report          | 1               | 1% (5)   | 12 |          |
| Summative        | Midterm Exam    | 1r. and half    | 10% (10) | 7  | LO # 1-3 |
| assessment       | Final Exam      | 3hrs.           | 50% (50) | 16 | All      |
| Total assessment |                 | 100% (100Marks) |          |    |          |

|         | Delivery Plan (Weekly Syllabus)   |
|---------|---|
|         | المنهاج االأسبوعي النظري  |
|         | Material Covered  |
| Week 1  | Integration: Introduction of Integrations, Types of integrations, Integrations of special functions, such as:   |
| WCCKI   | Algebraic functions, celling and floor functions.   |
| Week 2  | Trigonometric functions, Natural logarithm function, Exponential function, Exponential and logarithmic function bases other than e.                     |
| Week 3  | Hyperbolic functions, Inverse of trigonometric functions, Inverse of hyperbolic functions.  |
| Week 4  | Techniques of integration: Integration using substitution, Integration by parts, Integration of Trigonometric(power, product).                          |
| Week 5  | Trigonometric substitutions, Rational functions and partial fractions.  |
| Week 6  | Rationaling substitutions, Integration of rational function in sine and cosine, Integral by hyperbolic substation.                                      |
| Week 7  | Mid-term Exam + Improper Integral, Comparison test for improper Integrals, King property integration.   |
| Week 8  | Applications of integration: Definition of Areas and types of areas, Definition Volumes, Types of volumes.  |
| Week 9  | Types of volumes, length of curves in the plane, Areas of Surfaces of revolution.   |
| Week 10 | Review the Cartesian coordinates with two dimensions, Polar Coordinates and types of polar equations.   |
| Week 11 | Symmetric of polar, Converting between Cartesian and polar, Tangents to polar curves, Area with polar, Arc length of polar curves.                      |
|         | Cartesian coordinates with three dimensions, Representations and decrement octanes, distance formula and section  |
| Week 12 | formula in three dimensions, graphs, Applications in three dimensions, introduction of cylindrical and spherical coordinates with converting.           |
| Week 13 | Introduction about Sequences, formula of sequences, types of sequences, convergent and divergent of sequences,  Testing for monotonicity for sequences, |

| Week 14 | Introduction about series and formula of series, geometric series, Test convergence and divergence of series. |
|---------|---|
| Week 15 | Introduction of polynomials, Maclaurin polynomial, Taylor polynomial.   |
| Week 16 | Preparatory week before the final Exam  |

|        | Delivery Plan (Weekly Lab. Syllabus) |  |  |  |  |
|--------|--------------------------------------|--|--|--|--|
|        | المنهاج الأسبوعي المختبر             |  |  |  |  |

# Module Aims, Learning Outcomes and Indicative Contents

أهداف المادة الدراسية ونتائج التعلم والمحتويات اإلرشادية

### **Module Aims**

أهداف المادة الدراسية

- 1. The department is interested in graduating cadres specialized in mathematics
- Preparing outstanding students who are able to complete their postgraduate studies from masters and doctorates, in which the country suffers from a shortage
- 3. Graduating qualified students to work as research assistants in all scientific institutions in the field of mathematics
- 4. Preparing specialized cadres to work in the various state institutions, such as teaching in schools and others in the field of mathematics

# Module Learning Outcomes

مخرجات التعلم للمادة الدراسية

### - A. Knowledge and Understanding

- A1 That the student be able to familiarize himself with the basic concepts and principles of all courses in the Mathematics Department.
  - A 2- That the student be able to know the importance of the branches of mathematics and link them to life reality.
- A3 That the student is able to understand the definitions, mathematical facts, and theories related to the vocabulary and courses of the mathematics department.
  - A4- The student learns about the relationship between the curricula of the Mathematics Department.
- A 5- That the student becomes familiar with the applications of the courses in

|                            | B 1- The student acquires the skill of solving mathematical problems of all kinds and forms.  |
|----------------------------|---|
| <b>Indicative Contents</b> | B 2- To be able to employ theories in solving mathematical problems, and to have the ability to prove and prove proper mathematical proof.      |
| المحتويات الإرشادية        | B 3- Develop the student's ability to deal with new and advanced cases and to deal with mathematical problems with all skill and high accuracy. |

# Indicative Contents المحتويات الأرشادية

This module covers matrix theory and linear algebra, emphasizing topics useful in other disciplines. Linear algebra is a branch of mathematics that studies systems of linear equations and the properties of matrices. The concepts of linear algebra are extremely useful in physics, economics and social sciences, natural sciences, and engineering. Due to its broad range of applications, linear algebra is one of the most widely taught subjects in college-level mathematics

### **Learning and Teaching Strategies**

استراتيجية التعلم و التعليم

### **Strategies**

Type something like: The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering the type of simple experiments involving some sampling activities that are interesting to students.

# Student Workload (SWL)

الحمل الدراسي للطالب محسوب لـ ١٥ اسبوعا

| Structured SWL (h/sem)                      | 79  | Structured SWL (h/w)                     | 5.2 |
|---|-----|--|-----|
| الحمل الدر اسي المنتظم للطالب خالل الفصل    |     | الحمل الدر اسي المنتظم للطالب أسبو عيا   |     |
| Unstructured SWL (h/sem)                    | 4.6 | Unstructured SWL (h/w)                   | , , |

| Module Aims, Learning Outcomes and Indicative Contents<br>أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية |   |  |  |  |
|--|---|--|--|--|
|  | Physical Sciences aims to develop learners':  • Interest in and appreciation of physics and chemistry, and their usefulness in helping to explain phenomena and solve problems encountered in their ever-changing world  • Understanding of the theories and models used to describe, explain and |  |  |  |
|  | make predictions about diverse natural phenomena and chemical systems, structures and properties  |  |  |  |
| Module Objectives<br>أهداف المادة الدراسية   | Understanding of the ways in which matter and energy interact in physical systems across a range of scales  |  |  |  |
|  | Understanding of the factors that affect chemical systems, and how chemical systems can be controlled to produce desired products   |  |  |  |
|  | Appreciation of physics and chemistry as experimental sciences that have developed through independent and collaborative research, and that have significant impacts on society and implications for decision making  |  |  |  |
|  | Expertise in conducting a range of scientific investigations, including the collection and analysis of qualitative and quantitative data and the  |  |  |  |

|  | intermentation of avidance   |
|--|--|
|  | interpretation of evidence   |
|  | Ability to critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions  |
|  | Ability to communicate scientific understanding and findings to a range of audiences, including through the use of appropriate representations, language and nomenclature.   |
| Module Learning Outcomes                   | On successful completion of this course, students will be able to:  1. Plan activities, monitoring and evaluating progress while completing activities, meeting deadlines and contributing to completion of group activities in the context of physics and chemistry  2. Communicate, predict and explain physical science phenomena, using qualitative and quantitative representations in appropriate modes and genres, and following accepted conventions and terminology |
| مخرجات التعلم للمادة الدراسية              | <ul> <li>3. Apply discriminating research skills and apply the principles of academic integrity; collecting and recording primary and secondary data from a variety of relevant sources</li> <li>4. Utilize practical skills safely, and competently select and use scientific techniques and againment to collect and against data related to physics.</li> </ul>   |
|  | techniques and equipment to collect and organize data related to physics and chemistry  5. Use scientific inquiry skills to enable them to perform and evaluate experiments relating to physics and chemistry; analyzing and   |
|  | interpreting data to draw valid conclusions  |
|  | 6. Make connections between knowledge of physics and chemistry and ethical, political, cultural, social, economic and scientific considerations in differing contexts  |
|  | 7. Apply physics and chemistry concepts, models and theories to analyze physical and chemical phenomena  8. Apply physics and chemistry processes to analyze physical and  |
|  | chemical phenomena.  |
|  | For the content areas of Physical Sciences, the three (3) interrelated strands:  1-Science Inquiry Skills  2-Science as a Human Endeavour  3-Science Understanding.  |
| Indicative Contents<br>المحتويات الإرشادية | In the practice of science, the three strands are closely integrated. The work of scientists reflects the nature and development of science, is built around scientific inquiry, and seeks to respond to and influence society.  Science Inquiry Skills and Science as a Human Endeavour strands (respectively):   |
|  | <ul> <li>Undertake, interpret and analyze experiments and investigations</li> <li>Analyze the application and impact of physical science in society</li> <li>Must be integrated into the five interwoven threads of Science</li> </ul>   |

# **Learning and Teaching Strategies**

استراتيجية التعلم والتعليم

### **Strategies**

- Use analogies and anecdotes.
- Group your students by knowledge gaps.
- Tell your students what they don't know.
- Teach everything you can get away with.
- Summarize the material in different ways.
  - Encourage them to ask questions.
- Use anecdotes to show how physics works.

| Success<br>Group<br>(50 - 100) | A - Excellent           | امتياز                 | 90 - 100 | Outstanding Performance               |  |  |
|                                | <b>B</b> - Very Good    | جيد جدا                | 80 - 89  | Above average with some errors        |  |  |
|                                | C - Good                | جيد                    | 70 - 79  | Sound work with notable errors        |  |  |
|                                | <b>D</b> - Satisfactory | متوسط                  | 60 - 69  | Fair but with major shortcomings      |  |  |
|                                | E - Sufficient          | مقبول                  | 50 - 59  | Work meets minimum criteria           |  |  |
| Fail Group (0 – 49)            | <b>FX</b> – Fail        | راسب<br>(قيد المعالجة) | (45-49)  | More work required but credit awarded |  |  |
|                                | <b>F</b> – Fail         | راسب                   | (0-44)   | Considerable amount of work required  |  |  |
|                                |                         |                        |          |                                       |  |  |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
